A CRM APPLICATION FOR THECHAISHOP&CO

User Story:

As a sales representative at TheChaiShop&Co, I want to efficiently manage customer relationships and streamline sales processes using our CRM application. I want to easily access and update employer details, as well as distinguish between online and offline customer records using record types, allowing for personalized interactions. Additionally, I need the application to automate sales calculations, such as order quantity and total bill amount, to ensure accurate and efficient transactions. Moreover, I require the ability to generate insightful reports and dashboards to summarize and analyze sales data effectively, aiding in decision-making and strategy development. Lastly, I would like the application to automate email notifications to customers on their birthdays, informing them of special offers tailored to celebrate their special day, enhancing customer engagement and loyalty.

1. INTRODUCTION

1.1 Project Overview :

The project titled "A CRM Application for TheChaiShop&Co" is a Salesforce-based Customer Relationship Management (CRM) system developed to digitize and automate the operations of a traditional chai shop.Currently, TheChaiShop&Co manages its customer details, orders, and billing processes manually using registers and Excel sheets. This leads to data inconsistency, incorrect bill calculations, delayed reports, and lack of customer engagement.To overcome these issues, this CRM application is built on the Salesforce Lightning Platform. The system provides a centralized platform to manage three main entities: Customers, Orders, and Employer/Branch details. The application uses Salesforce's powerful features like Custom Objects, Record Types, Validation Rules, Flows, Reports, Dashboards, and Email Automation to streamline the entire sales lifecycle.The key highlight of the system is its ability to differentiate between Online and Offline customers using Record Types, automate Order Quantity and Total Bill Amount calculations using Flows, and automatically send Birthday Offer emails to customers to improve loyalty and retention. The system also provides real-time Reports and Dashboards for managers to make data-driven business decisions.

1.2 Purpose :

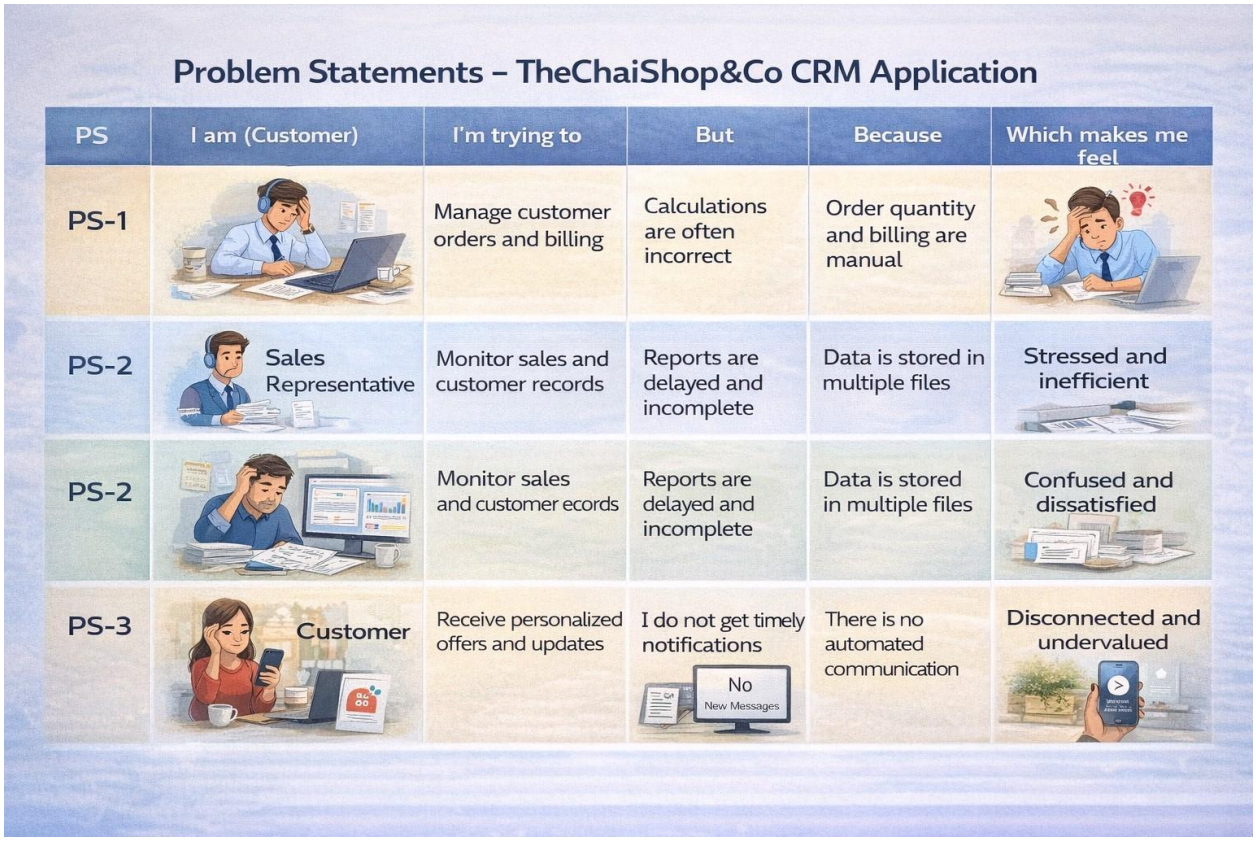

The purpose of this project is to:

- Customer-a Manage Panna
- Billing-a Automate Panna
- Data Correct-a Irukkanum
- Decision Edukka
- Customer-a Happy-a Vechikka

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Admin	Manage customer and employee information	Records are difficult to update	Information is maintained manually	Confused and overloaded
PS-2	Customer	Get quick responses to enquiries	Responses are sometimes delayed	Customer enquiries	Ignored and dissatisfied
PS-3	Store Manager	Track overall business performance	It takes time to collect sales information	There is no centralized dashboard	Worried and dissatisfied

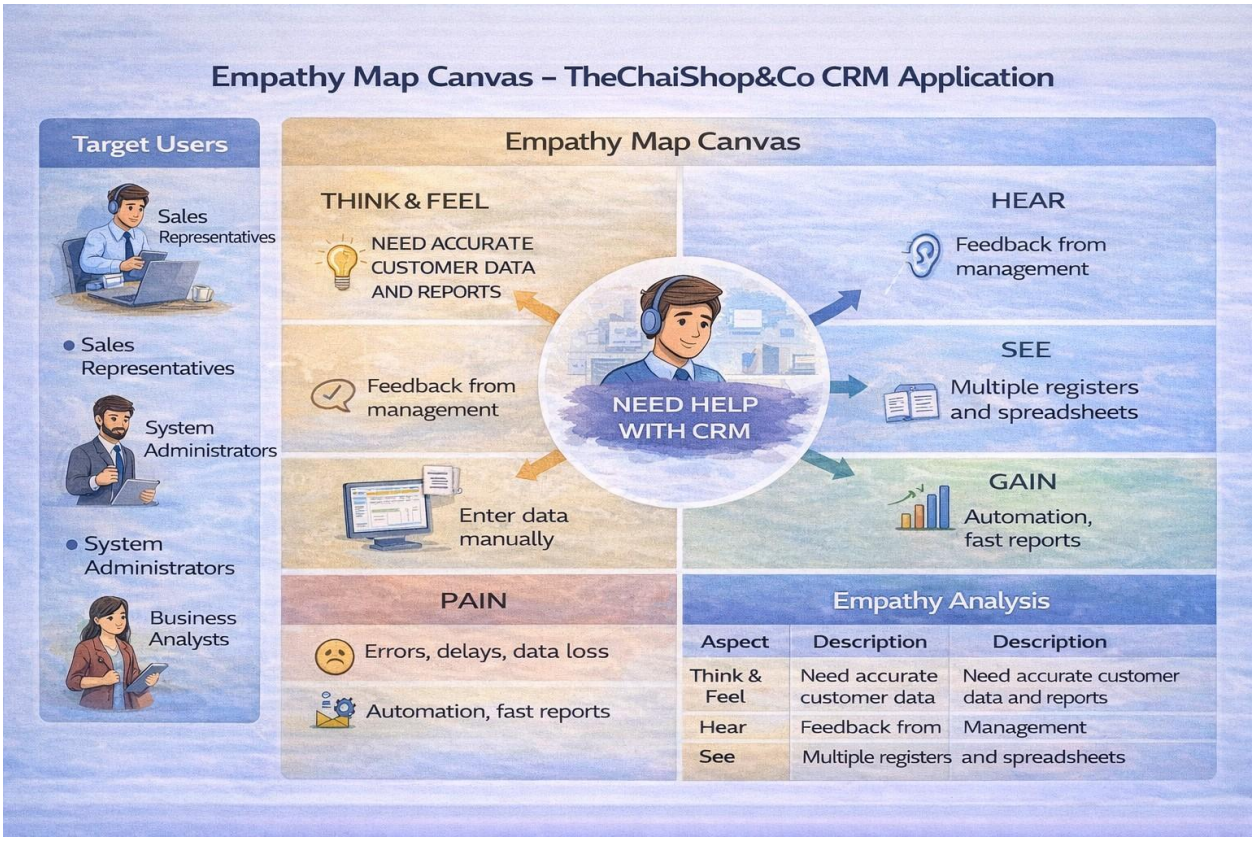

2.2 Empathy Map Canvas

Target Users

- **Sales Representative**
- **Store Manager**
- **Customer**
- **Admin Empathy Analysis**

Aspect	**Description**
Hear	Feedback from management
Say	I need all customer information in one place
Pain	Manual data entry, duplicate records

Need	Centralized customer database, accurate reports
Gain	better sales monitoring, reduced manual work
Feel	Need accurate customer data and reports

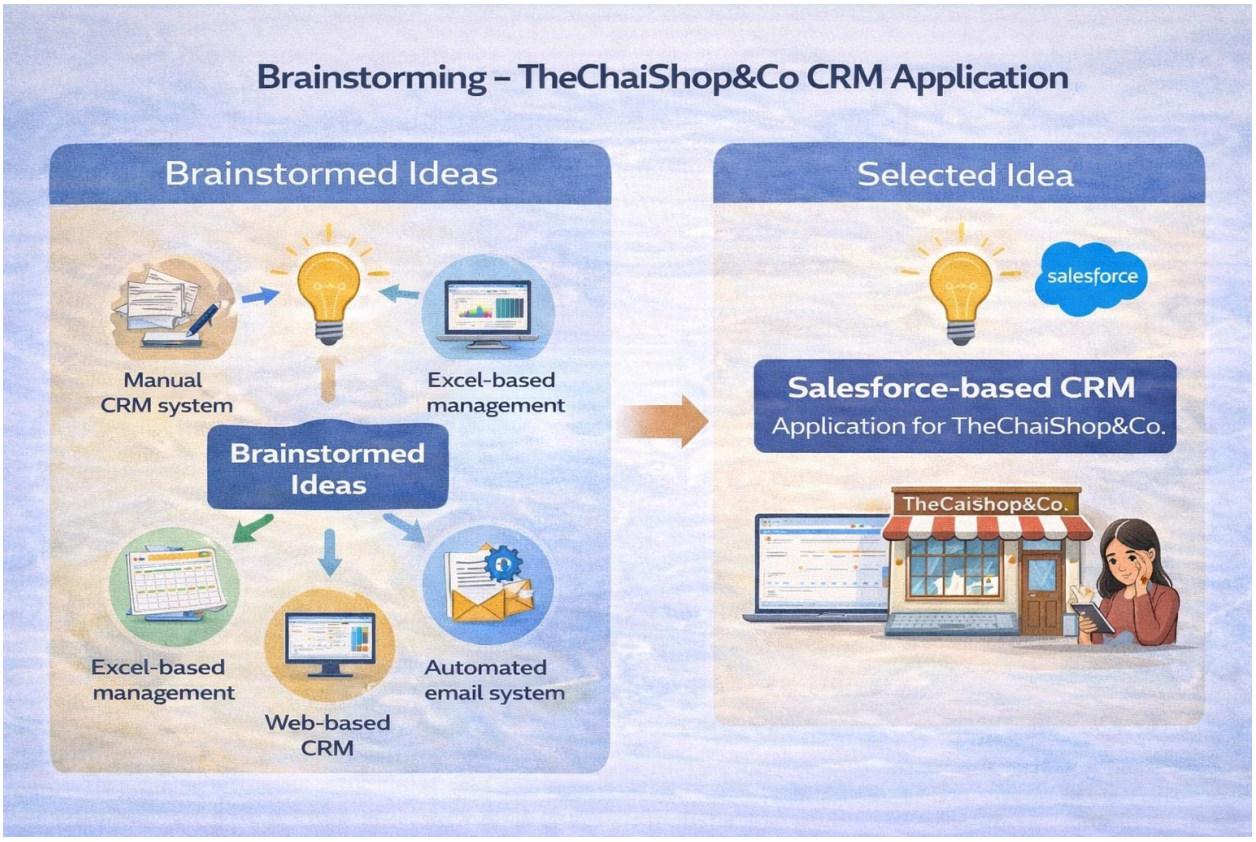

2.3 Brainstorming

Brainstormed Ideas

Selected Idea:

- Customer Management
- Sales Tracking
- Customer Database
- Sales Dashboard
- Order History

Salesforce-based CRM Application for TheChaiShop&Co..

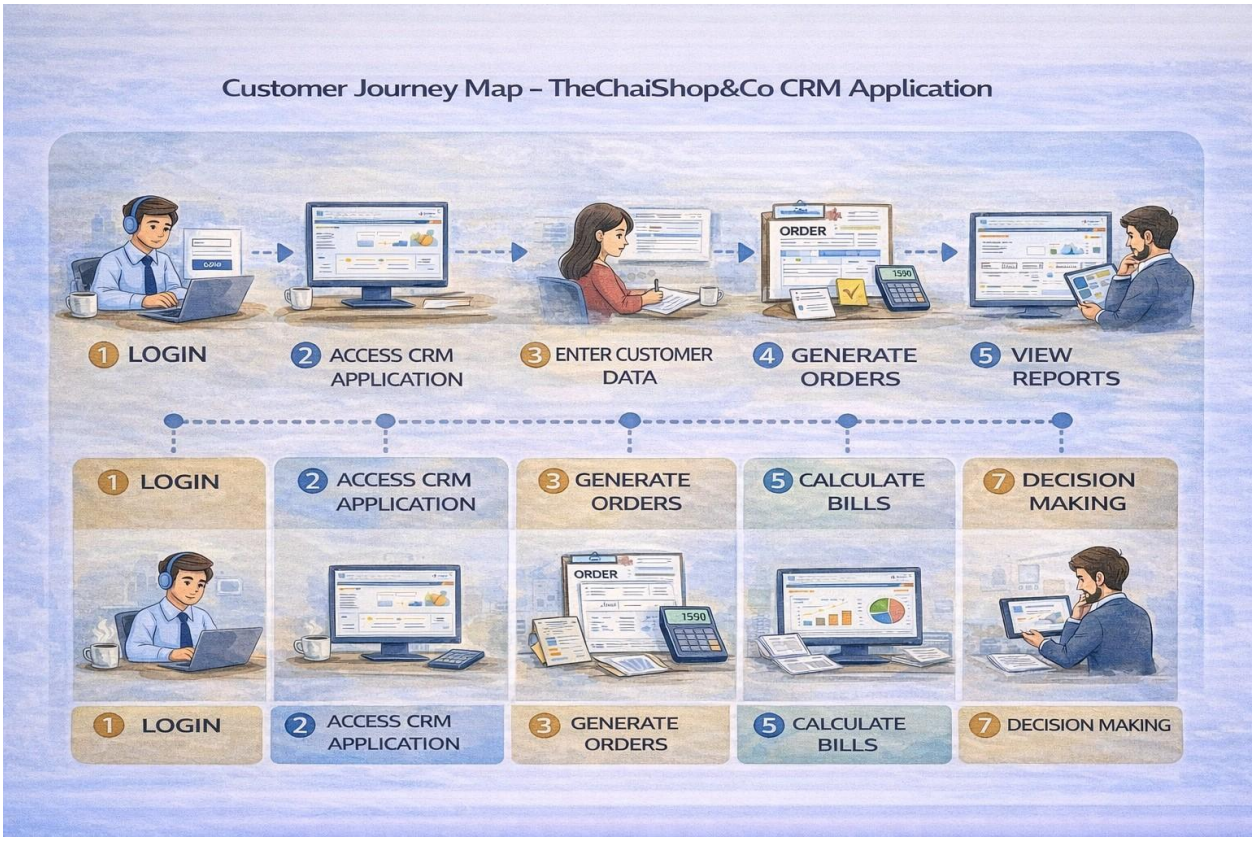

3.REQUIREMENT ANALYSIS PHASE

3.1 Customer Journey Map

Journey Stages:

- Login
- Access CRM Application
- Enter Customer Data
- Generate Orders
- Calculate Bills
- View Reports
- Decision Making

3.2 Solution Requirements

Functional Requirements

FR No	Requirement
FR-1	User Login
FR-2	Object Creation
FR-3	Data Entry
FR-4	Billing Automation
FR-5	Report Generation
FR-6	Email Automation

Non-Functional Requirements NFR-1: Usability

The system should be easy to use for sales representatives, managers, administrators, and analysts without requiring technical training.

Requirements :

- Simple and intuitive user interface
- Clear navigation menus
- Easy-to-understand forms
- User-friendly dashboards

Example:

A new sales employee should be able to log in, enter customer details, and generate orders within a few minutes without help.

Salesforce Lightning UI provides drag-and-drop features and easy navigation.

NFR-2: Security

The system must protect customer and business data from unauthorized access.

Requirements:

- Role-based access control
- Secure login authentication
- Encrypted data storage
- Data backup and recovery **Examples:**

- Profiles and permission sets
- Object-level and field-level security
- Restricted billing access
- Secure login and password policies

NFR-3: Reliability

The CRM system should work correctly at all times and store data accurately without loss.

Requirements:

- Automatic data saving
- Regular system backups
- Error handling mechanisms
- Stable cloud environment

Example :

If a user enters order data and the internet disconnects, the system should save the information and restore it later.

Salesforce cloud ensures automatic backups.

NFR-4: Performance

The system should respond quickly and handle large amounts of data efficiently.

Requirements:

- Fast page loading
- Quick report generation
- Smooth dashboard rendering
- Minimal delay

Example: When a manager generates monthly sales reports for hundreds of customers, the report should load within 2–3 seconds.

Optimized queries and caching improve speed.

NFR-5: Availability

The system should be accessible whenever required.

Requirements:

- 24/7 system availability
- Minimal downtime
- Cloud-based hosting
- Disaster recovery

Example: Managers should be able to access the CRM system during peak business hours, weekends, or late nights.

Salesforce cloud provides high uptime.

NFR-6: Scalability

The system should support business growth without affecting performance.

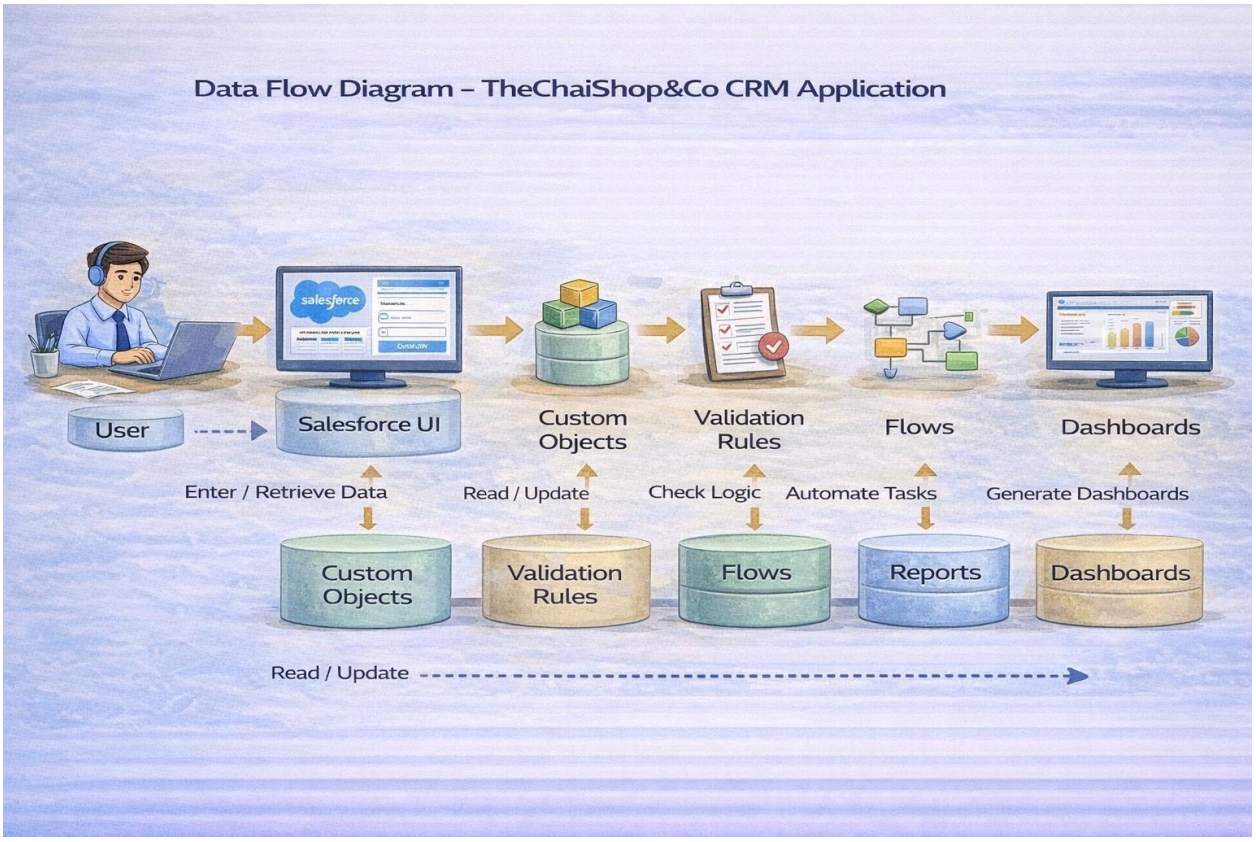

Requirements:

- Ability to handle more users
- Support increasing customer data
- Expandable storage
- Maintain system speed

Example: If TheChaiShop&Co expands to multiple branches, the CRM system should support thousands of customers without slowing down. Salesforce infrastructure automatically scales.

3.3 Data Flow Diagram

User → Salesforce UI → Custom Objects → Validation Rules → Flows → Reports → Dashboards.

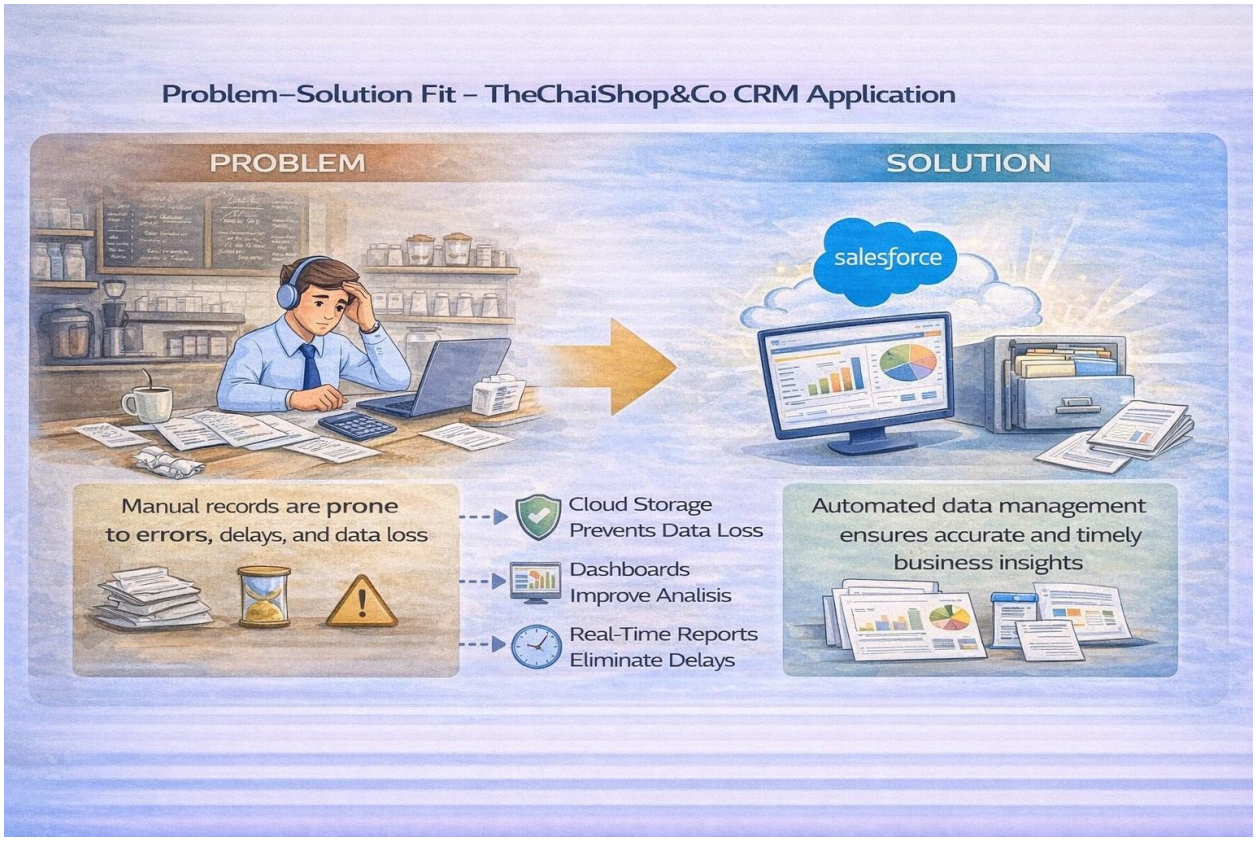

3.4 Technology Stack

Layer	**Technology**
Frontend	Salesforce Lightning
Database	Salesforce Cloud
Automation	Flows
Backend	Salesforce Platform
Analytics	Reports & Dashboards

4. PROJECT DESIGN PHASE

4.1 Problem–Solution Fit

The CRM system replaces manual records with automated data management. Cloud storage prevents data loss, dashboards improve analysis, and real-time reports eliminate delays. This ensures accurate and timely business insights generation.

4.2 Proposed Solution

Functional Requirements

Parameter	Description
User Login & Authentication	Allows authorized users to securely log in to the CRM system using valid credentials.
Customer Record Management	Enables users to create, view, update, and delete customer details such as name, contact number, and address.
Employer & Enterprise Management	Allows management of employer and enterprise account information for business operations.
Order Management	Supports creation and tracking of customer orders, including order quantity and product details.
Automated Billing System	Automatically calculates total bill amount using formula fields based on order quantity and pricing.
Validation Rules	Ensures accurate data entry by validating fields such as phone number, PAN, and Aadhaar.
Record Types & Page Layouts	Provides different record types and layouts for various customer and enterprise categories.
Global Picklists	Maintains standardized values for fields such as product type, category, and status.
Email Notification System	Sends automated emails to customers for birthdays, offers, and order confirmations.
Workflow & Flow Automation	Automates tasks such as updating records and triggering alerts using Salesforce Flows.
Report Generation	Generates detailed reports on sales, customers, and enterprise performance.

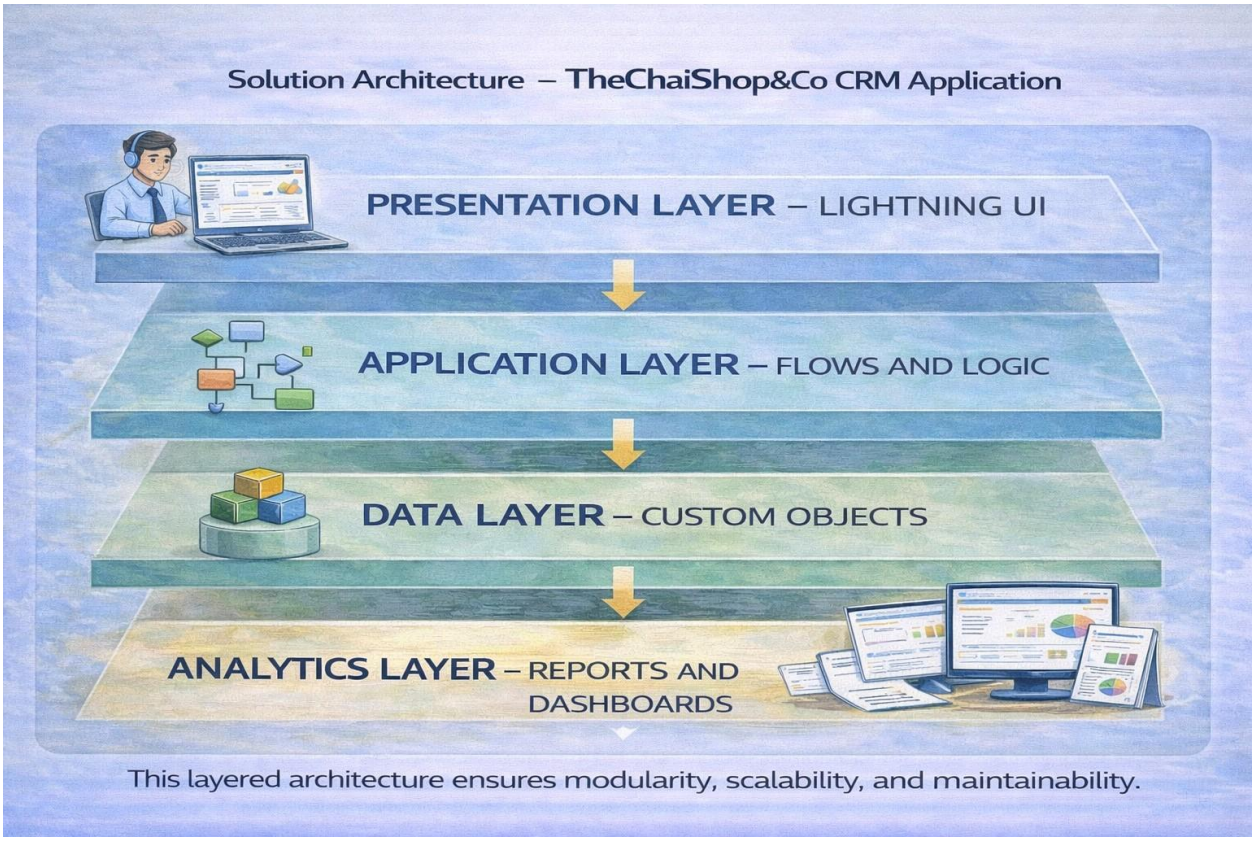

Dashboard Visualization	Displays real-time analytics through interactive dashboards and charts.
Data Backup & Recovery	Ensures secure storage and recovery of business data in the Salesforce cloud.
User Role Management	Controls system access using profiles and permission sets for different users.

4.3 Solution Architecture

Architecture Layers

1. Presentation Layer – Lightning UI
2. Application Layer – Flows and Logic
3. Data Layer – Custom Objects
4. Analytics Layer – Reports and Dashboards

This layered architecture ensures modularity, scalability, and maintainability.

5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

- The project followed an Agile-based development approach with defined milestones and sprints.
- A Salesforce Developer account was created to set up the development environment.
- Custom objects were designed to store customer, employer, and enterprise data.
- Custom tabs and a Lightning Application were developed for easy system navigation.

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Developer Setup	USN-1	As an admin, I want to create a Salesforce developer account so that I can configure and deploy the TheChaiShop&Co CRM application.	1	High	Member1
Sprint-1	Data Modeling	USN-2	As an admin, I want to create Customer, Employer, and Enterprise objects so that business data can be stored and managed systematically.	3	High	Member2

Sprint-2	Data Modeling	USN-3	As a user, I want separate tabs for each object so that I can easily navigate and manage CRM records within the application.	3	High	Member3

- Fields, relationships, and global picklists were configured to ensure data consistency.
- Page layouts and record types were created based on user roles and customer categories.
- Validation rules were implemented to prevent incorrect data entry.
- Email templates and automated flows were developed for customer notifications.
- Reports and dashboards were created for performance monitoring and analysis.
- Regular sprint reviews and testing were conducted to track progress and resolve issues.
- The project was completed within the planned timeline through systematic scheduling.

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-2	Data Modeling	USN-4	As a manager, I want a dedicated Lightning App so that all CRM operations are accessible from a single dashboard.	3	High	Member4
Sprint-2	Data Modeling	USN-5	As an admin, I want to create customer and order fields so that complete sales and billing details can be captured accurately.	5	Medium	Member1
Sprint-2	Data Modeling	USN-6	As a user, I want customized page layouts for different record types so that only relevant information is displayed during data entry	5	High	Member2
Sprint-2	Data Modeling	USN-7	As a manager, I want separate record types for Retail and Enterprise customers so that different business categories can be managed efficiently.	5	Medium	Member3
Sprint-3	Automation	USN-8	As a system, I want to validate customer details and order inputs so that incorrect data entries are prevented.	3	High	Member4
Sprint-3	Automation	USN-9	As a system, I want automated flows to send email notifications so that customers receive timely updates and offers.	5	High	Member1
Sprint-4	Automation	USN-10	As a system, I want to automatically calculate billing amounts so that invoices are generated without manual effort.	5	High	Member2
Sprint-5	Reports	USN-11	As a manager, I want sales and customer reports so that I can monitor business performance and make informed decisions.	4	High	Member3
Sprint-6	Dashboards	USN-12	As a manager, I want visual dashboards so that I can quickly analyze sales, customers, and enterprise performance.	4	Medium	Member4

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6 Days	24 Oct 2022	29 Oct 2022	20	29 Oct 2022
Sprint-2	20	6 Days	31 Oct 2022	05 Nov 2022		
Sprint-3	20	6 Days	07 Nov 2022	12 Nov 2022		
Sprint-4	20	6 Days	14 Nov 2022	19 Nov 2022		

6. Project Development Phase:

Project Flow

Milestone 1 : Creation of developer account
Milestone 2 : Object Creation
Milestone 3 : Tabs
Milestone 4 : The Lightning App
Milestone 5 : Global Picklist
Milestone 6 : Fields and Relationships
Milestone 7 : Creation of Page Layout
Milestone 8 : Creation of Record Types
Milestone 9 : Validation rules
Milestone 10 : Email Templates
Milestone 11 : Flows
Milestone 12 : Reports and Dashboards
Milestone 13 : Conclusion

What you'll learn

1. Real Time Salesforce Project
2. Standard and Custom objects

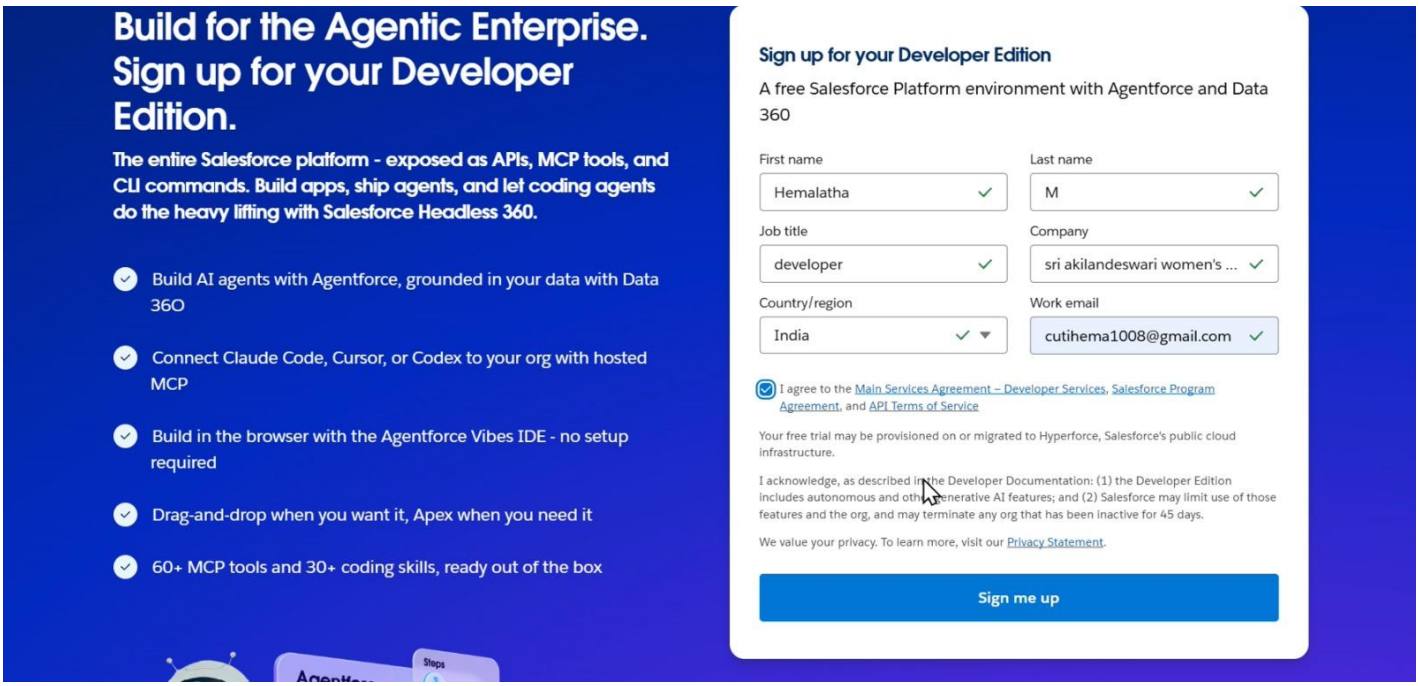

3. Picklist Value sets
4. Types of Fields & their relationships.
5. Page Layouts
6. Record Types
7. Validation Rules
8. Email Templates
9. Flows
10. Reports and Dashboards.

Implementation

Milestone 1 - Salesforce developer account creation :

Activity 1: Creating Developer Account:

Creating a developer org in salesforce.
1. Go to https://developer.salesforce.com/signup 2.
On the sign up form, enter the following details :

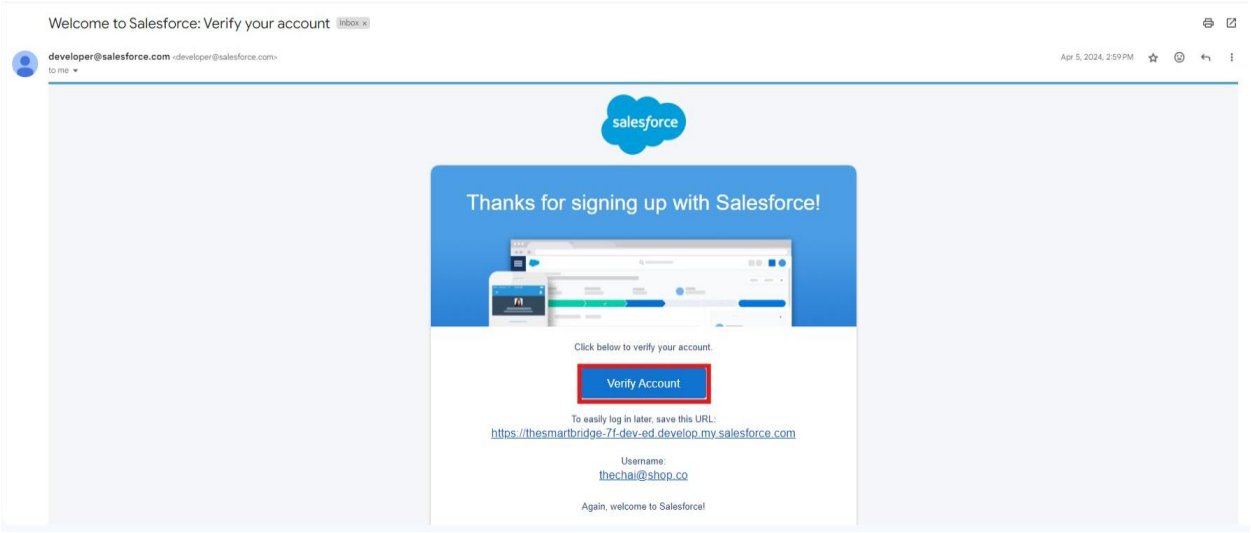

1) First name & Last name
2) Email
3) Role : Developer

4) Company : College or Company Name
5) County : India
6) Postal Code : pin code
7) Username : should be a combination of your name and company

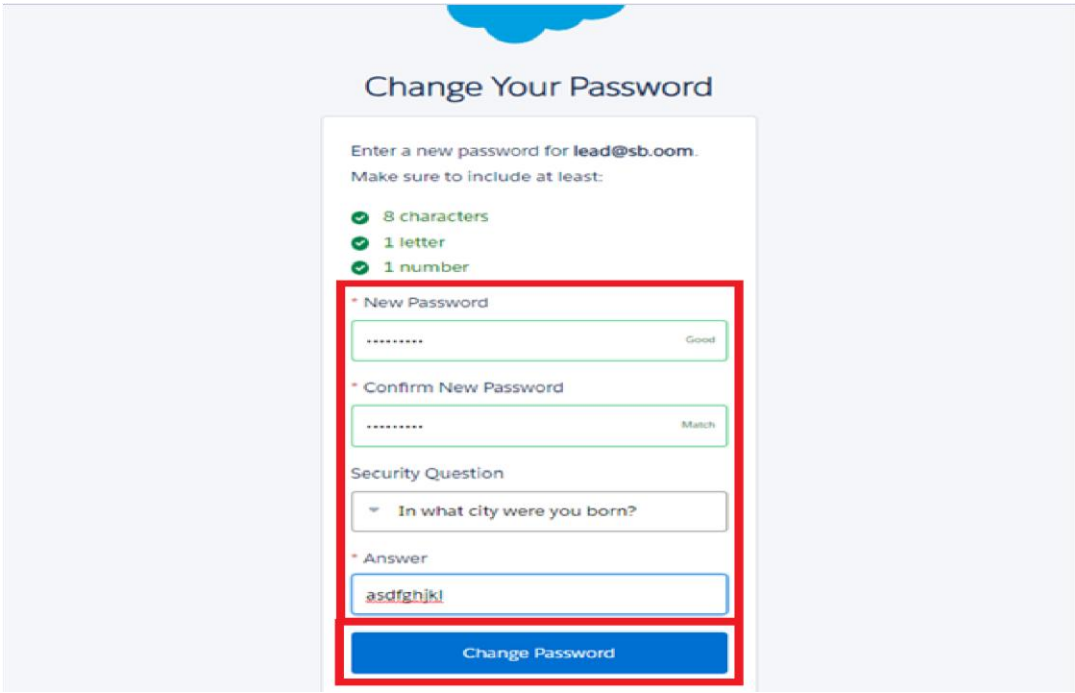

This need not be an actual email id, you can give anything in that format : username@organization.com
Click on sign me up after filling these.

Activity 2: Account Activation :

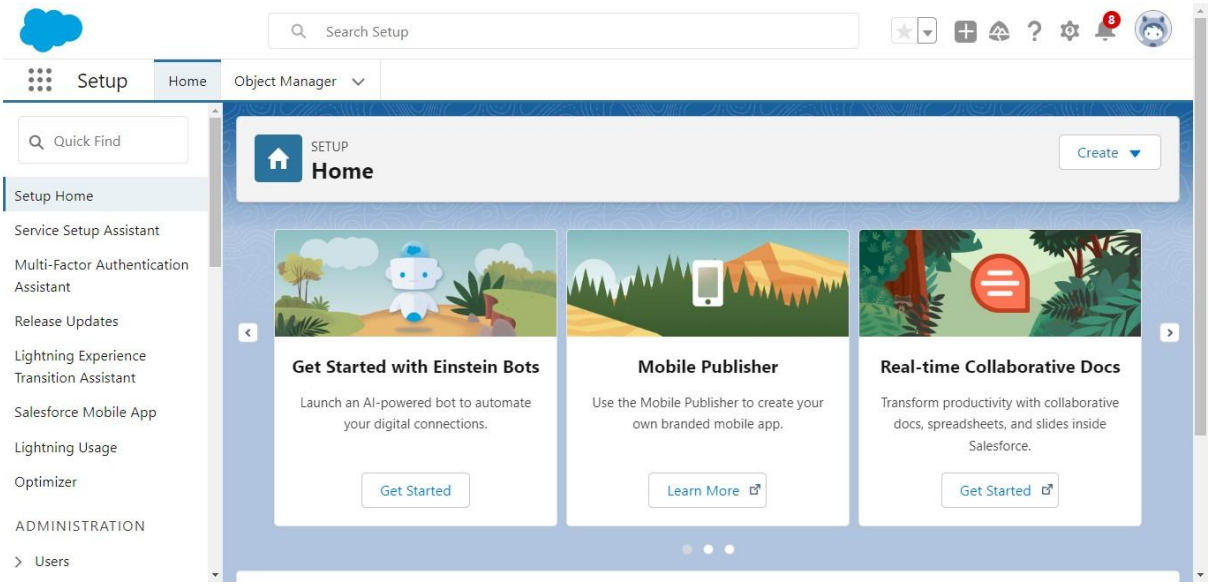

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

2. Click on Verify Account.
3. Give a password and answer a security question and click on change password.

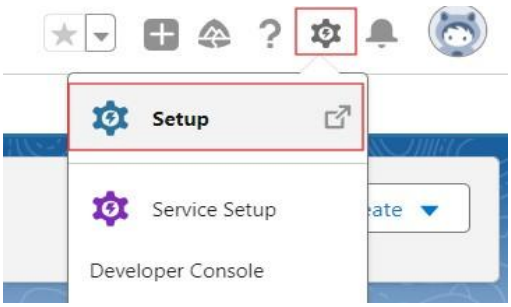

4. Then you will redirect to your salesforce setup page.

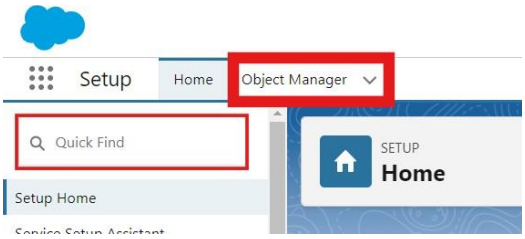

Milestone 2 - Objects

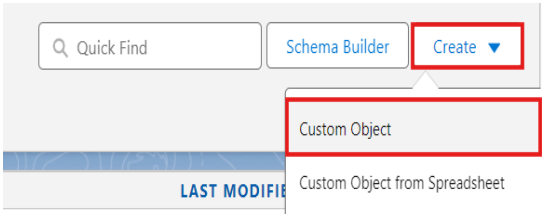

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.

2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.

3. On the Object Manager page, click Create | Custom Object.

Activity 1 : Employer Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.
   - **Label** : Employer Account
   - **Plural Label** : Employer Accounts
   - Enter Record Name Label and Format
     Record Name : Employer Account Name
     Data Type **:** Text
   - **In Optional features :** check the boxes for Allow Reports | Allow Activities | Track Field History.
   - **Search Status :** check the box for Allow Search.
   - Save

Activity 2 : Customer Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.
    - **Label** : Customer Account
    - **Plural Label** : Customer Accounts
    - Enter Record Name Label and Format
      Record Name : Customer Account Name
      Data Type **:** Text
    - **In Optional features :** check the boxes for Allow Reports | Allow Activities | Track Field History.
    - **Search Status :** check the box for Allow Search.
    - Save

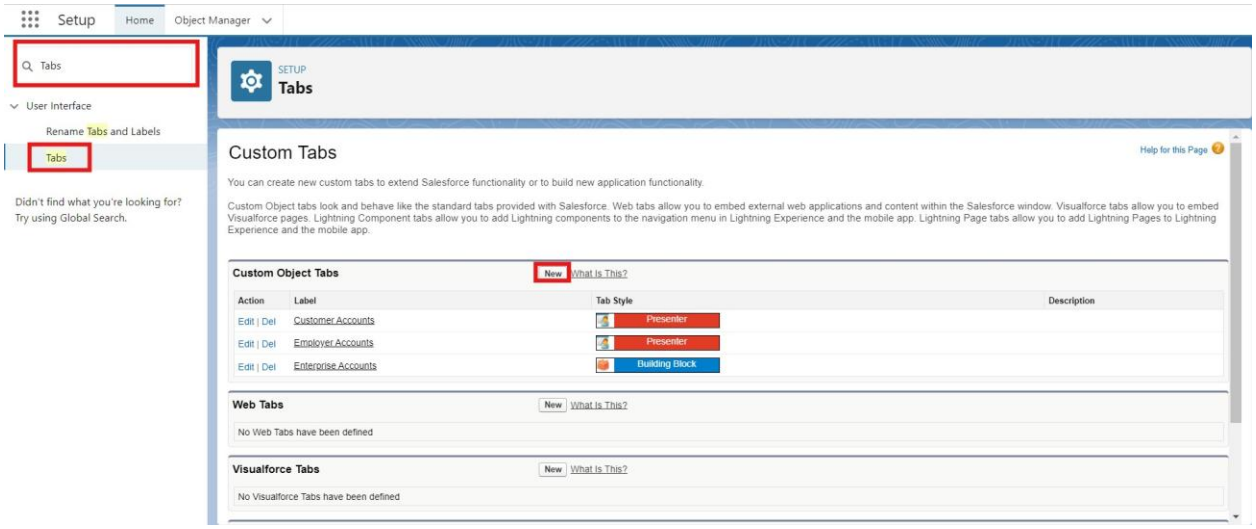

Activity 3 : Enterprise Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.
    - **Label** : Enterprise Account
    - **Plural Label** : Enterprise Accounts
    - Enter Record Name Label and Format
      Record Name : Enterprise Account Name Data Type **:** Text
    - **In Optional features :** check the boxes for Allow Reports | Allow Activities | Track Field History.
    - **Search Status :** check the box for Allow Search.
    - Save

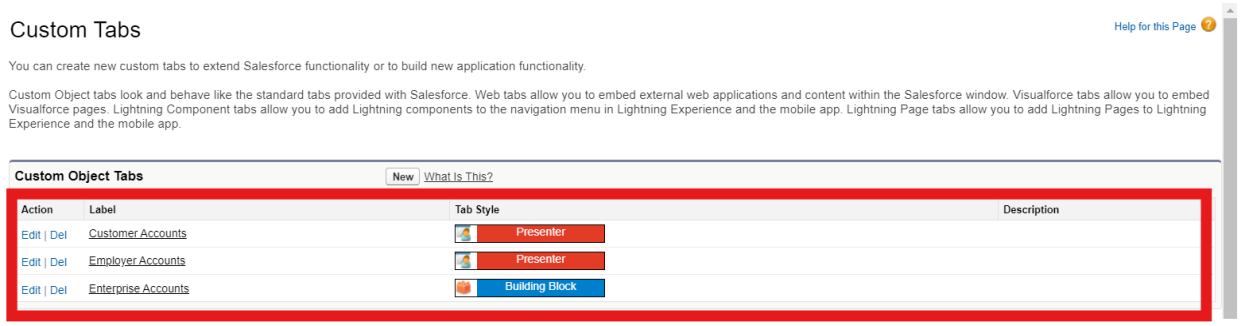

Milestone 3 - Tabs

Activity 1 : Custom tabs creation

1. Go to setup page → type Tabs in Quick Find bar → click on tabs → New (under custom object tab)

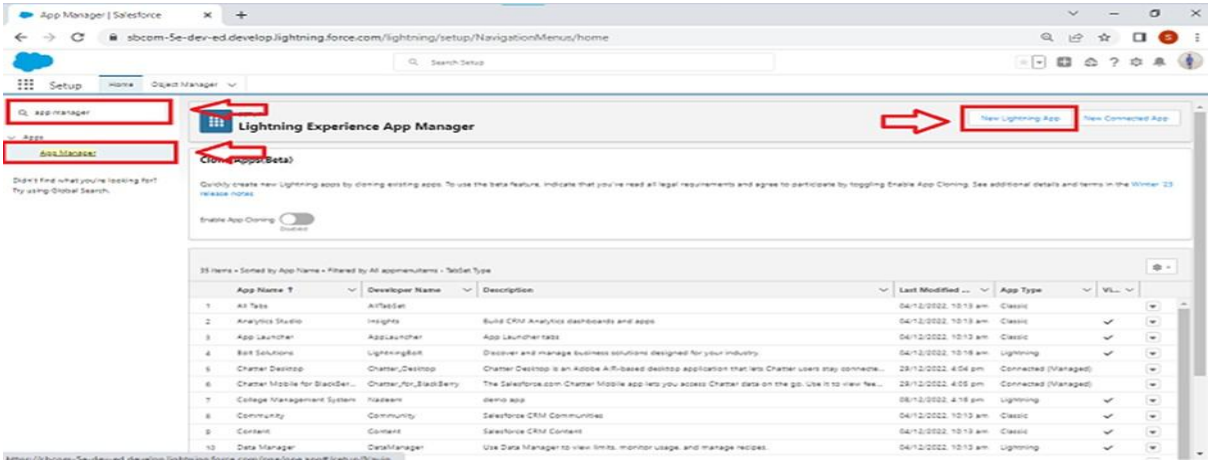

2. Select Object(Employer Accounts) → Select the tab style → Next (Add to profiles page) keep it as default → Next (Add to Custom App) uncheck the include tab .
3. Make sure that the Append tab to users' existing personal customizations is checked.
4. Click save.
5. Repeat the same steps for Customer Accounts and Enterprise Accounts.

Milestone 4 - The Lightning App

Activity 1 : Create a lightning app

1. Go to setup page → search “app manager” in quick find → select “app manager” → click on New lightning App.

2. Fill the app name in app details and branding as follow

App Name : TheChaiShop&Co

Developer Name : Auto Populates

Add image optional (if you want to give any image you can otherwise not mandatory) - Add Primary color Hex or leave it to default. Then click Next.

3. In App options

Navigation style : Standard navigation

Setup experience : setup

Supporters form factors : Desktop and phone

Then click Next

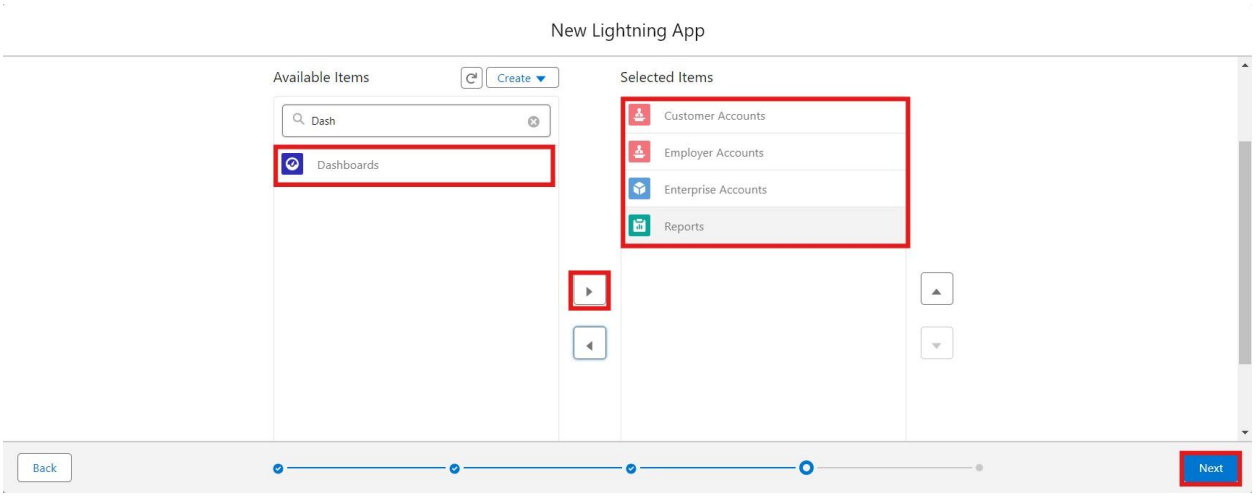

4. In Utility items

Utility Bar alignment : Default Then click Next.

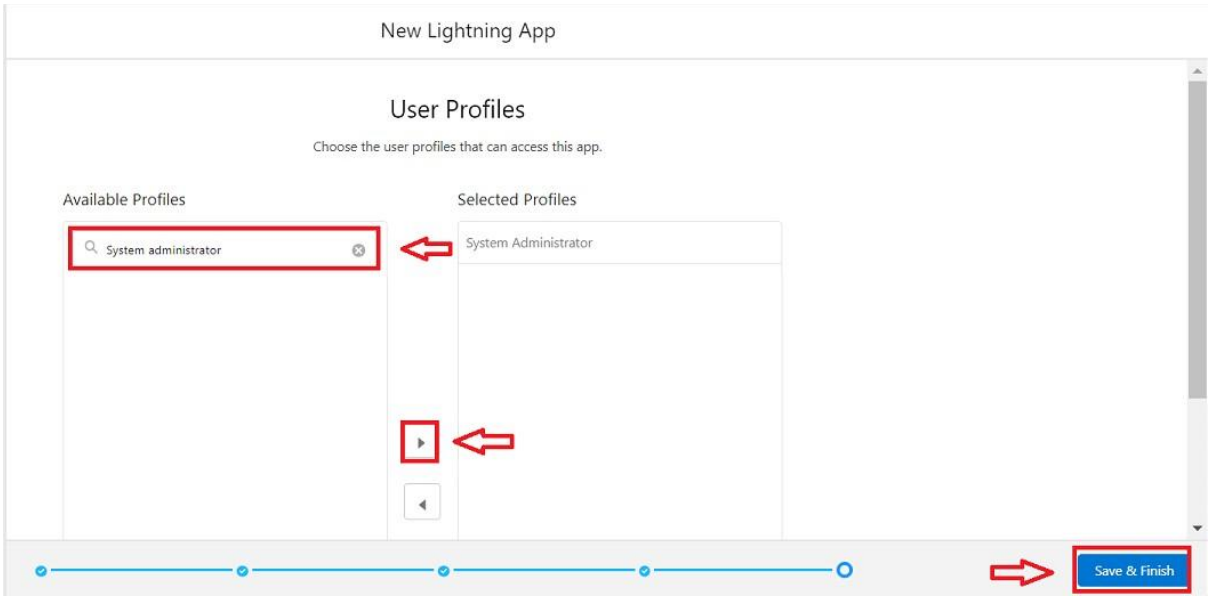

5. Navigation items

Select the created Custom Objects and required standard objects

- Customer Accounts
  Employer Accounts
  Enterprise Accounts
  Reports
  Dashboards

6. To Add User Profiles : System Administrator

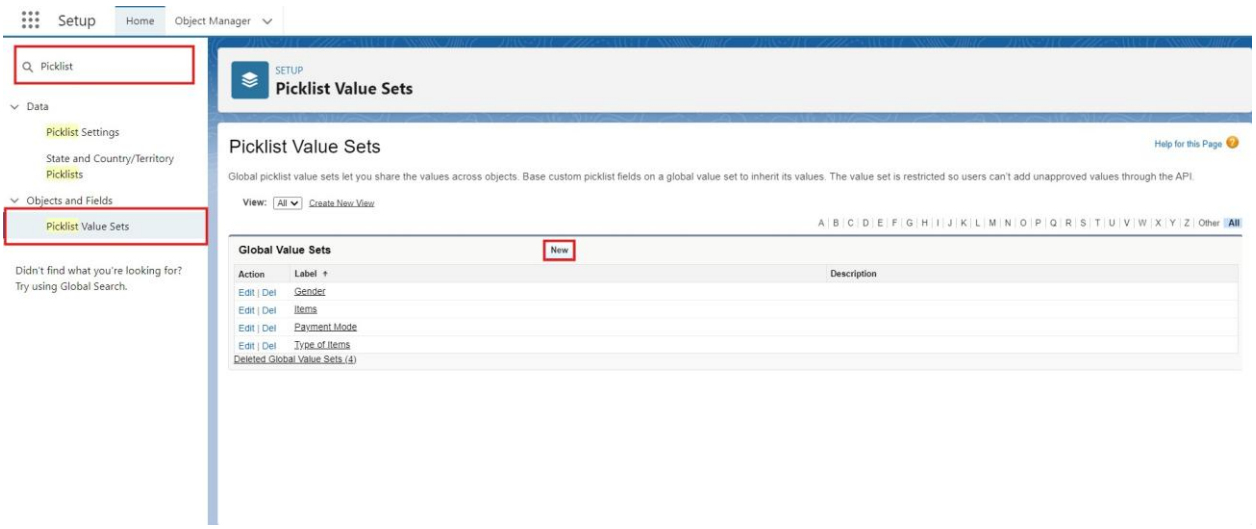

7. Click Save & Finish.

Milestone 5 : Global Picklist

Activity 1 : Create Global Plcklist

1. In Quick find box search for : Picklist value sets and click New.

- **Label** : Gender

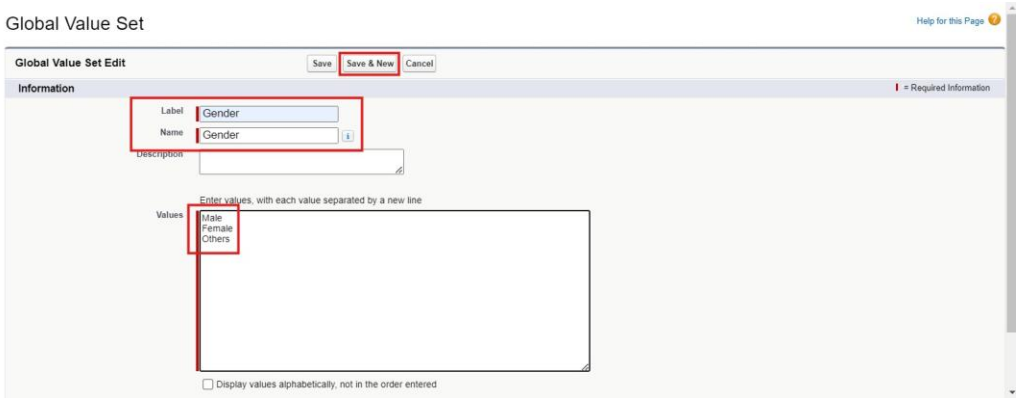

Name : Auto Populates

Values : Male

Female

Others Click

Save & New.

2. Create three more Global picklists following the same steps.

- **Label** : Items **Name** : Auto populates

Values : Platinum Tea Powder

Double Delight Tea Powder

Super Dust Tea Powder

Osmania Biscuits (Value Pack)

Osmania Biscuits (Premium Pack)

Dry Fruit Biscuits

Fruit Biscuits

Salt Biscuits

Multigrain Biscuits

Ragi Biscuits
Double Choco Chip Cookies
Butter Almond Cookies
Melting Moments Cookies
Honey Oats Cookies
Delight Box
Signature Box
Assorted Box

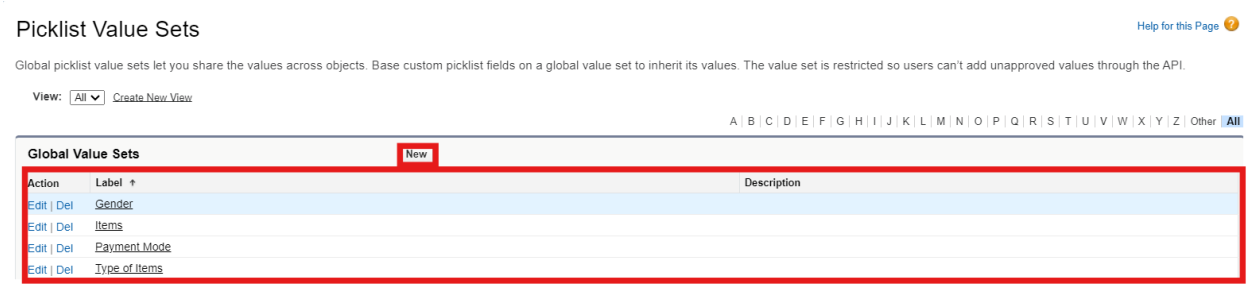

Click **Save & New.**

- **Label** : Payment Mode

Name : Auto populates
Values : Gpay
PhonePe
Paytm
Credit or Debit card
Cash.
Click **Save & New.**

- **Label :** Type of Items

Name : Auto populates
Values : Tea powder
Cookies
Gift Hampers
Click **Save.**

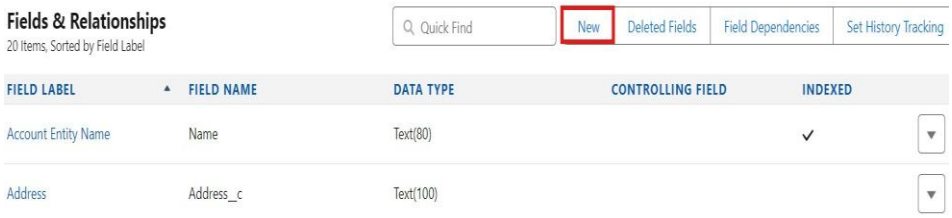

Milestone 6 : Fields & Relationships

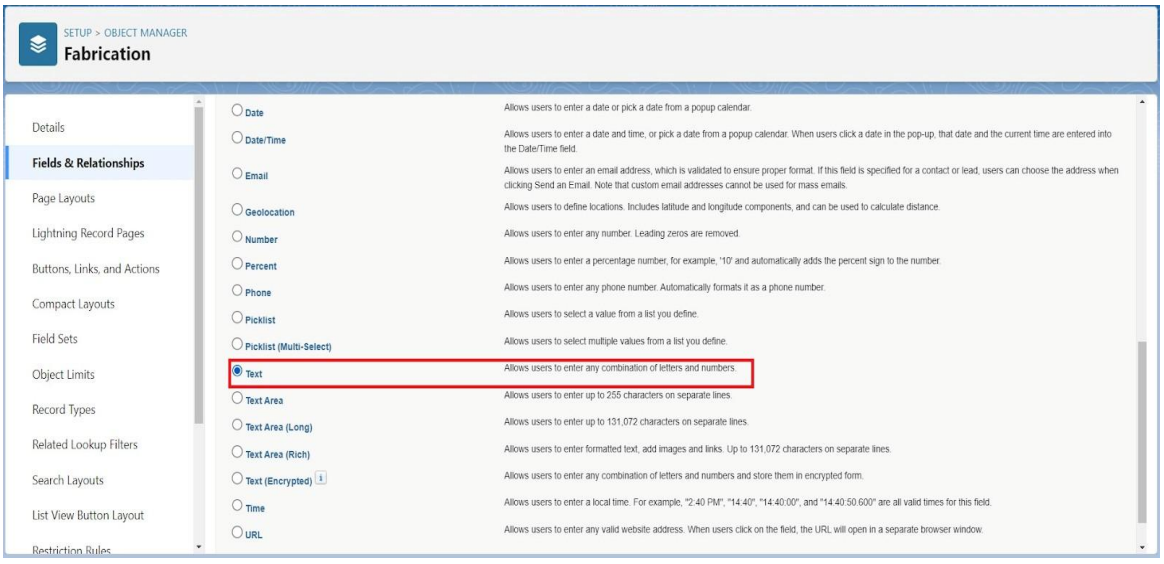

Activity 1 : Create Custom fields for Employer Account

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.

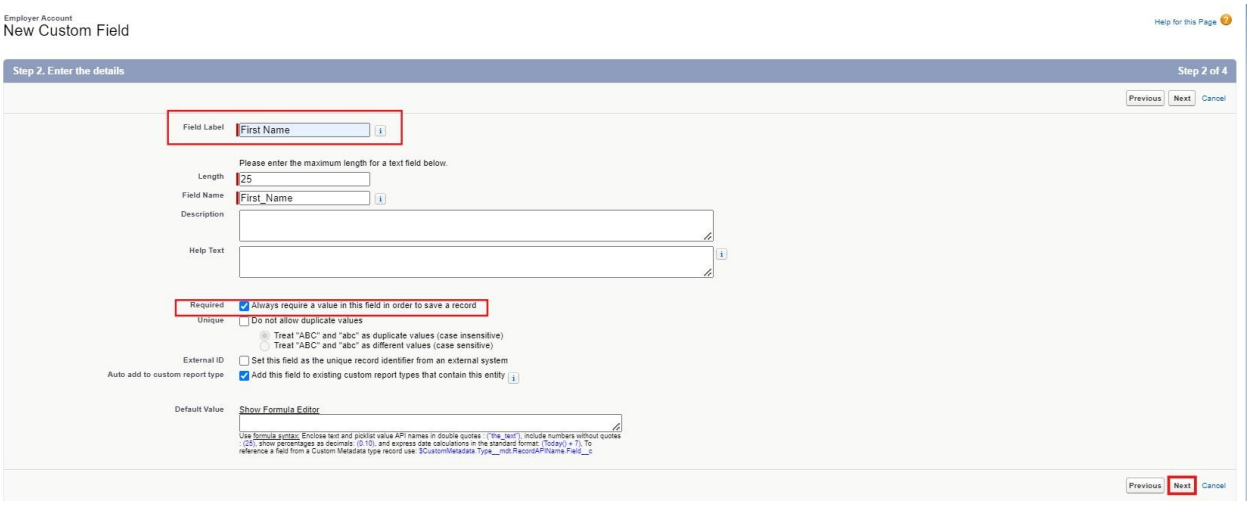

2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.
3. From the object manager page, In the Quick Find box, Search for the custom object you just created : **Employer Account**
4. From the sidebar, click Fields & Relationships. Notice that there are already some fields there. Those are the standard fields.
5. Click New to create a custom field. Tip: Before creating a new field, do a quick search to make sure a similar one doesn't already exist.

6. Next, choose a data type as Text. Choosing a data type helps you format the field input.

7. Click on next.

8. Data Type : Text

Field Label: First Name

Field Name : Auto Populates

Length : 25

Required : Check the box

Click on Next → Next → Save and new.

9. Repeat the Same steps for remaining fields

- Data Type : Text

Field Label: Last Name

Field Name : Auto Populates

Length : 25

Required : Check the box

Click on Next → Next → Save and new.

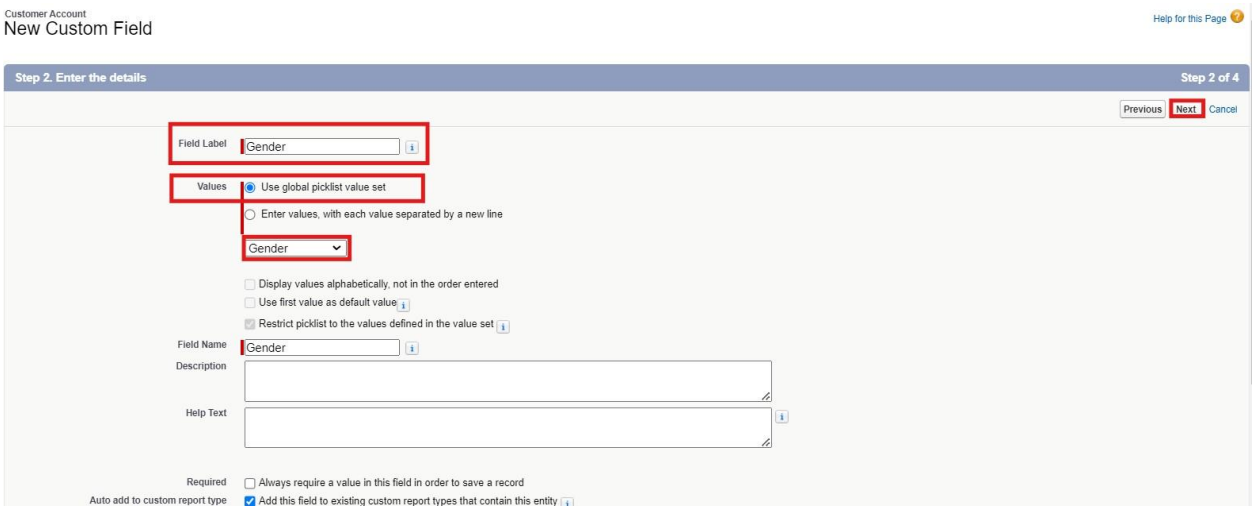

- Data Type : **PickList**

Field Label: Gender

Values : Use **Global Picklist** value set and select **Gender** from the dropdown menu.

Field Name : Auto Populates. Required : Check the box

Click on Next → Next → Save and new.

- Data Type : Phone

Field Label : Phone Number
Field Name : Auto Populates Required
: Check the box
Click on Next → Next → Save and new.

- Data Type : Email

Field Label : Email ID
Field Name : Auto Populates Required
: Check the box
Click on Next → Next → Save and new.

- Data Type : Date

Field Label : Date of Birth
Field Name : Auto Populates Required
: check the box
Click on Next → Next → Save and new.

- Data Type : Text

Field Label : Aadhar Number
Field Name : Auto Populates
Length : 12
Click on Next → Next → Save and new.

- Data Type : Text

Field Label : PAN Details
Field Name : PAN_Details
Length : 10

Click on Next → Next → Save and new.

- Data Type : **Picklist**

Field Label : Designation
Field Name : Auto Populates
Value : Enter value, with each value separated by a new line.

Manager
Finance and Accounting
Kitchen Staff
Cashier
Servers

Click on Next → Next → Save and new.

- Data Type : **Currency**

Field Label : Salary Field Name : Auto Populates Click on Next → Next → Save.

Activity 2: Create Custom fields for Customer Account

1. Data Type : Text

Field Label: First Name
Field Name : Auto Populates
Length : 25
Required : Check the box
Click on Next → Next → Save and new.

2. Data Type : Text

Field Label: Last Name
Field Name : Auto Populates
Length : 25
Required : Check the box
Click on Next → Next → Save and new.

3. Data Type : **PickList**

Field Label: Gender
Values : Use **Global Picklist** value set and select Gender from the dropdown menu.

Field Name : Auto Populates. Required
: Check the box
Click on Next → Next → Save and new.

4. Data Type : Phone
Field Label : Phone Number
Field Name : Auto Populates Required
: Check the box
Click on Next → Next → Save and new.

5. Data Type : Date
Field Label : Date of Birth
Field Name : Auto Populates Required
: check the box
Click on Next → Next → Save and new.

6. Data Type : **Formula**
Field Label : Date of Birthday is today ?
Field Name : Auto Populates
Formula Return : **Checkbox** Formula
:

```
IF(
AND(
DAY( TODAY() ) = DAY( Date_of_Birth__c ) ,
MONTH ( TODAY()) = MONTH( Date_of_Birth__c )),
TRUE,
FALSE)
```

Click on Next → Next → Save and new.

7. Data Type : Email
Field Label : Email ID
Field Name : Auto Populates Required
: Check the box
Click on Next → Next → Save and new.

8. Date Type : Text
Field Label : Address
Field Name : Auto Populates
Length : 125
Click on Next → Next → Save and new.

9. Date Type : **Multi Select Picklist**

Field Label : Type of Items

Values : Use **Global Picklist** value set and select **Type of Items** from the dropdown menu.

Field Name : Auto Populates. Required

: Check the box

Click on Next → Next → Save and new.

10. Date Type : **Multi Select Picklist**

Field Label : Products purchased

Values : Use **Global Picklist** value set and select **Items** from the dropdown menu.

Field Name : Auto Populates. Required

: Check the box

Click on Next → Next → Save and new.

11. Date Type : **Multi Select Picklist**

Field Label : Chai

Value : Enter value, with each value separated by a new line.

TheChaiShop&Co Special Tea
Single Tea
Masala Tea
Lemon Tea
Ginger Tea
Green Tea
Sugar Free Tea

Click on Next → Next → Save and new.

12. Data Type : **Picklist**

Field Label : Payment Mode

Values : Use **Global Picklist** value set and select **Payment Mode** from the dropdown menu.

Field Name : Auto Populates. Required

: Check the box

Click on Next → Next → Save and new.

13. Data Type : **Lookup Relationship**

Related To : Employer Account

Field Label : Associated Employer Field

Name : Auto Populates

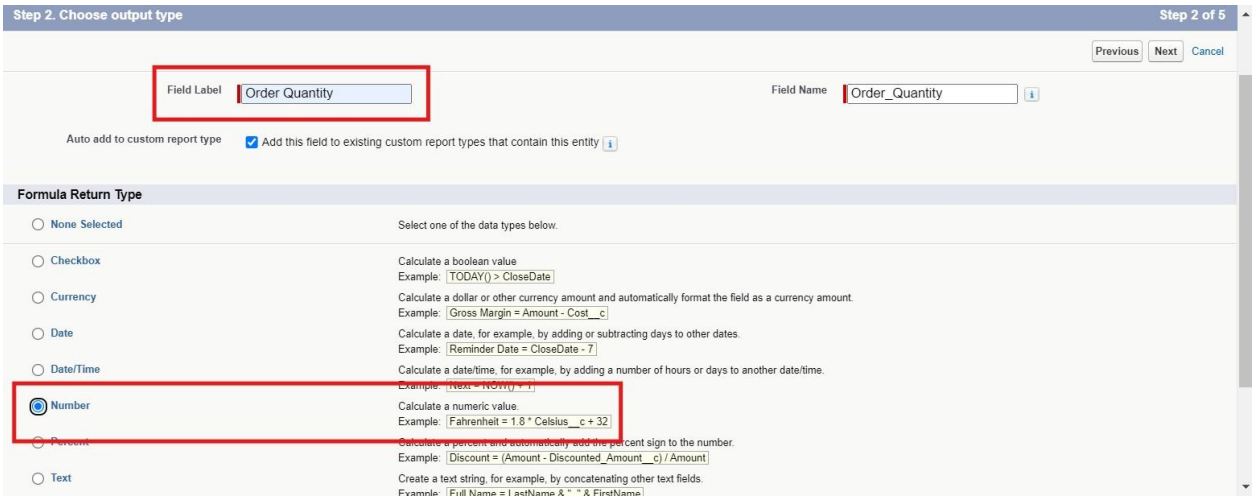

Click on Next → Next → Save and new.

14. Data Type : **Formula** Field Label : Order Quantity

Field Name : Auto Populates

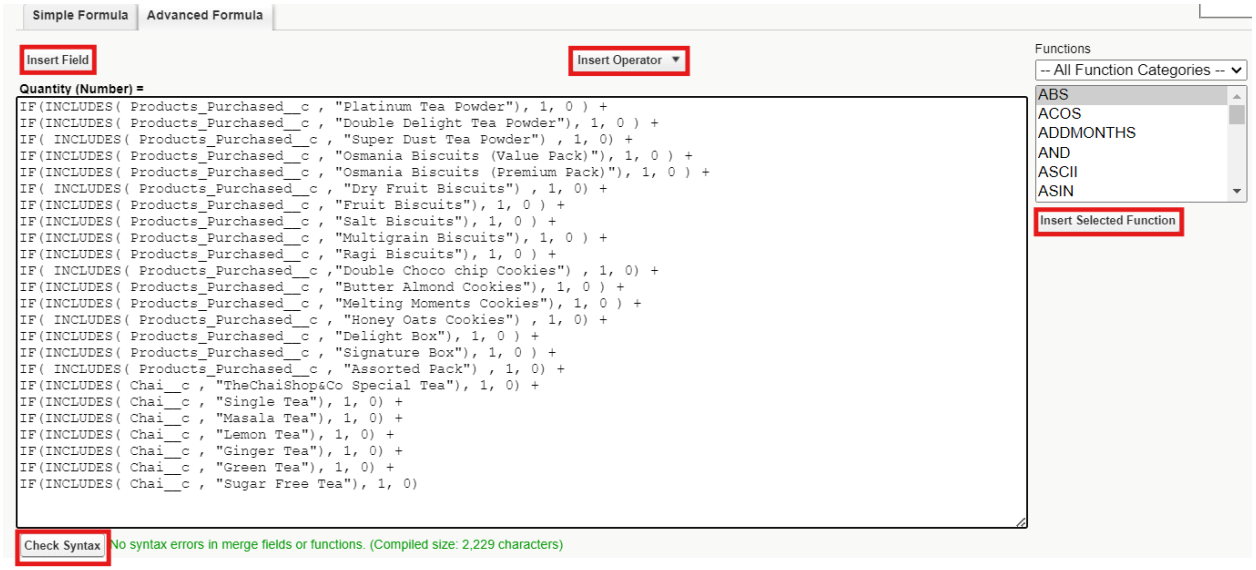

Formula Return : **Number**

Enter Formula = Quantity (Number) =

```

Activity 3: Create Custom fields for Enterprise Account

1. Data Type : Text

Field Label: Enterprise Name

Field Name : Auto Populates

Length : 25

Required : Check the box

Click on Next → Next → Save and new.

2. Data Type : Phone

Field Label : Phone Number

Field Name : Auto Populates Required

: Check the box

Click on Next → Next → Save and new.

3. Data Type : Email Field Label : Email ID

Field Name : Auto Populates Required

: Check the box

Click on Next → Next → Save and new.

4. Date Type : Text

Field Label : Address

Field Name : Auto Populates

Length : 125

Click on Next → Next → Save and new.

5. Date Type : **Multi Select Picklist**

Field Label : Type of Items

Values : Use **Global Picklist** value set and select **Type of Items** from the dropdown menu.

Field Name : Auto Populates. Required

: Check the box

Click on Next → Next → Save and new.

6. Date Type : **Multi Select Picklist**

Field Label : Products purchased

Values : Use **Global Picklist** value set and select **Items** from the dropdown menu.

Field Name : Auto Populates. Required

: Check the box

Click on Next → Next → Save and new.

7. Data Type : **Lookup Relationship**

Related To : Employer Account

Field Label : Associated Employer Field Name : Auto Populates

Click on Next → Next → Save and new.

8. Data Type : **Formula**

Field Label : Order Quantity

Field Name : Auto Populates

Formula Return : **Number**

Enter Formula = Quantity (Number) =

```
IF(INCLUDES( Products_Purchased__c , "Platinum Tea Powder"), 1, 0 ) +
        IF(INCLUDES( Products_Purchased__c , "Double Delight Tea Powder"), 1, 0 ) +
        IF( INCLUDES( Products_Purchased__c , "Super Dust Tea Powder") , 1, 0) +
        IF(INCLUDES( Products_Purchased__c , "Osmania Biscuits (Value Pack)"), 1, 0 ) +
        IF(INCLUDES( Products_Purchased__c , "Osmania Biscuits (Premium Pack)"), 1, 0 ) +

10. Data Type : **Picklist**
    Field Label : Payment Mode
    Values : Use **Global Picklist** value set and select **Payment Mode** from the dropdown menu.
    Field Name : Auto Populates.
    Required : Check the box Click on Next → Next → Save.

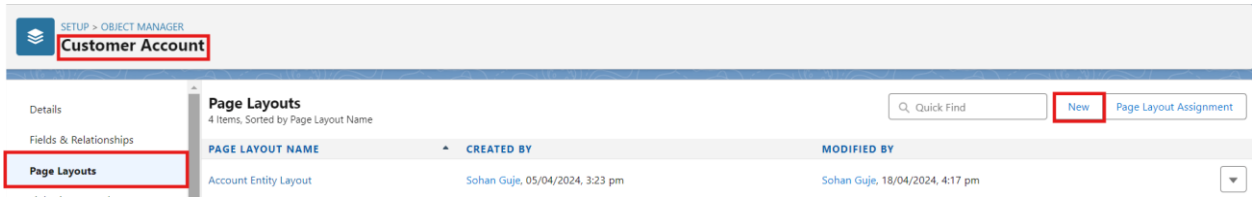

Milestone 7 : Page Layouts

For the personalized field view in Customer Accounts, let's create two page layouts Online orders and Walk-In orders.

Activity 1: Online Orders page layout

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.

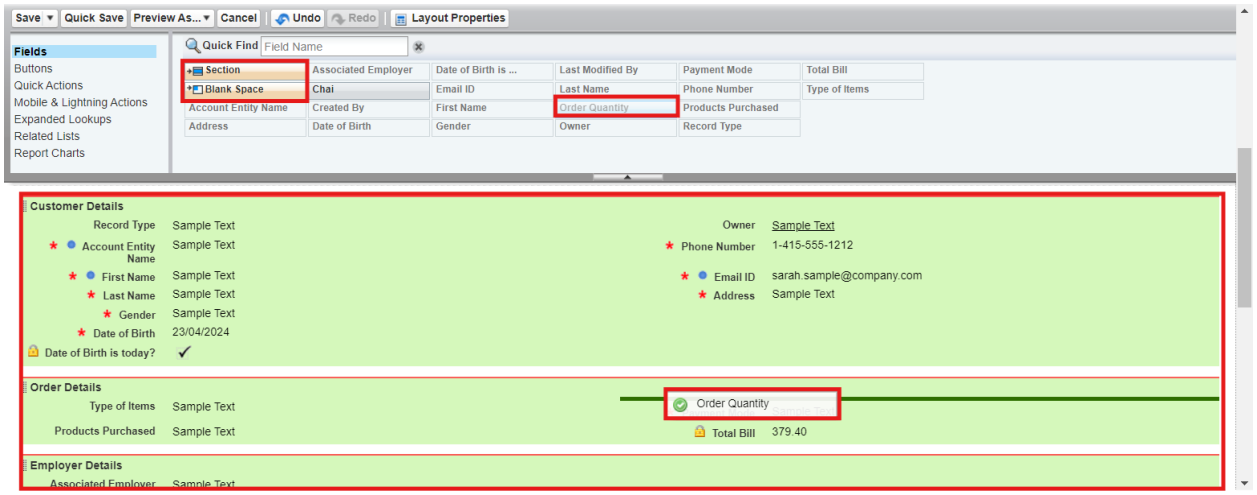

2. Click on the Page Layouts → click New.

3. Page Layout Name : Online Orders and click Save.

4. Drag and Arrange all the required fields as shown below.

5. Click **Save**.

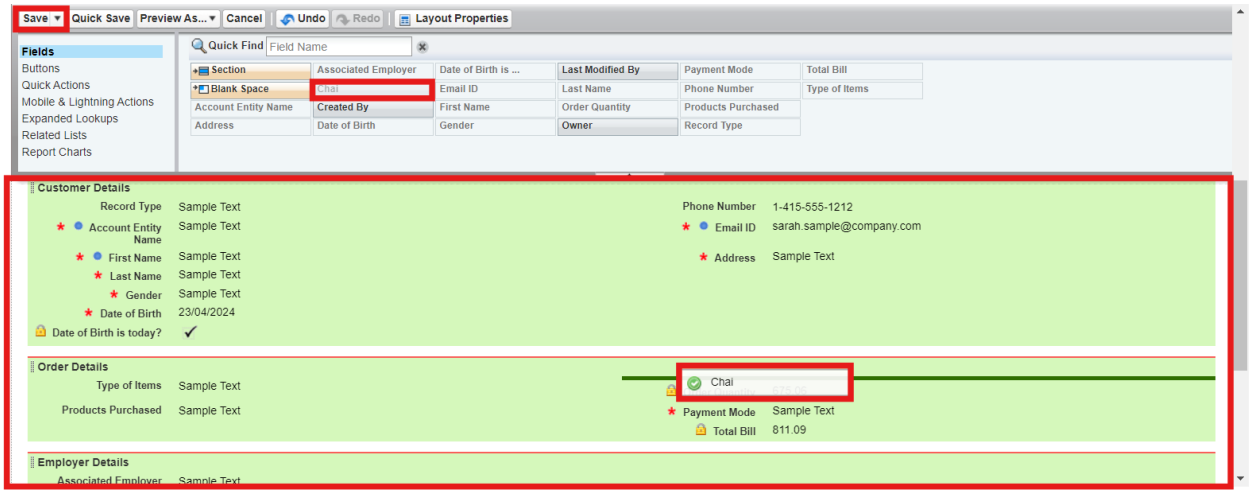

Activity 2: Walk-In Orders page layout

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.

2. Click on the Page Layouts → click New.

3. Page Layout Name : Walk-In orders and click save.

4. Drag and Arrange all the required fields as shown below.

5. Click **Save**.

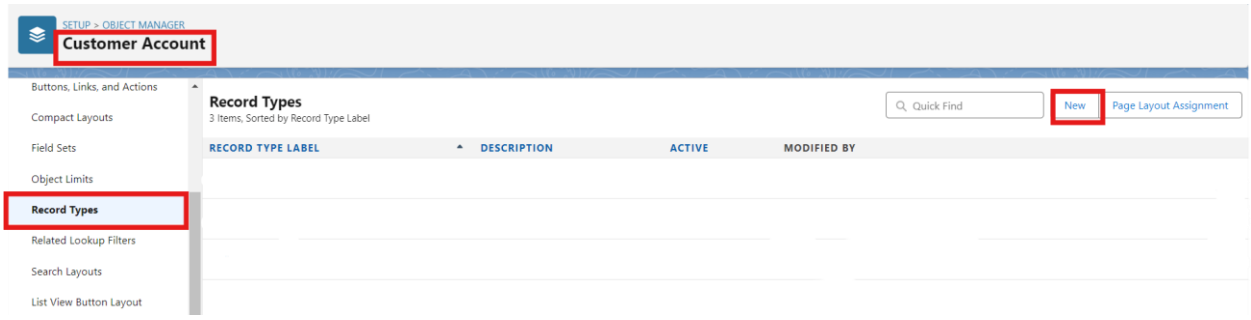

Milestone 8 - Record Types

To Differentiate the records and data stored in Customer Accounts, let's create two different Record Types.
Online orders and Walk-In orders.

Activity 1: Online Orders Record Type

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.

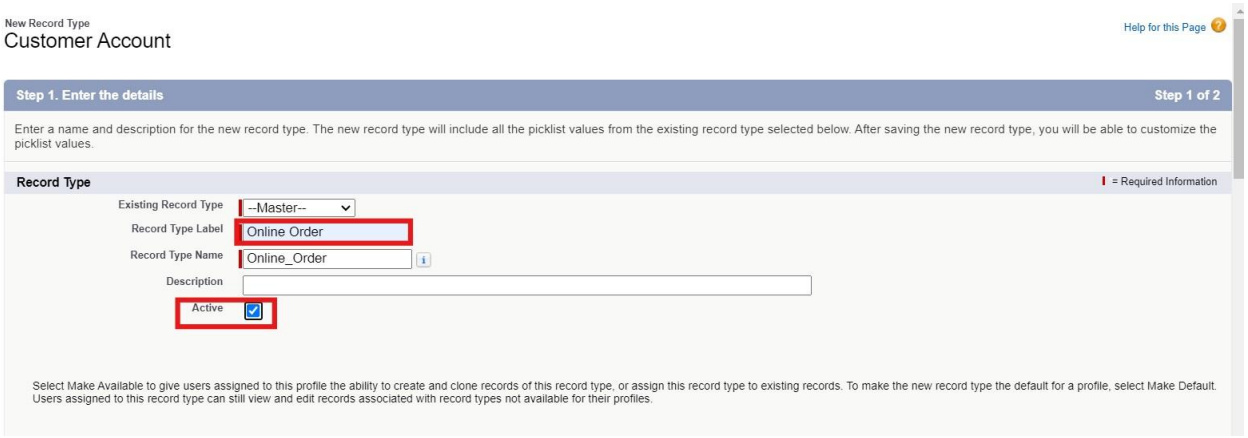

2. Click on the Record Types → click New.

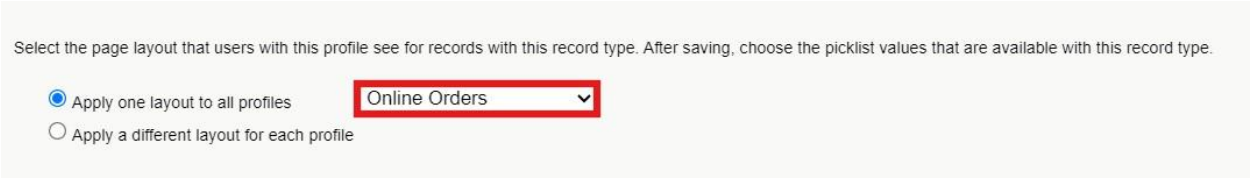

3. Enter Details :

Existing Record Type : Master
Record Type Label : Online Order
Record Type Name : Auto Populates
Active : Tick the checkbox

Click Next

4. In Assign Page Layouts
   - Select Apply one layout to all profiles : select **Online orders** from the drop down menu.

5. Click **Save and New**.

Activity 2: Walk-In Orders Record Type

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.

2. Click on the Record Types → click New.

3. Enter Details :

Existing Record Type : Master
Record Type Label : Walk-In Order
Record Type Name : Auto Populates
Active : Tick the checkbox
Click Next

4. In Assign Page Layouts
   - Select Apply one layout to all profiles : select **Walk-In orders** from the drop down menu.

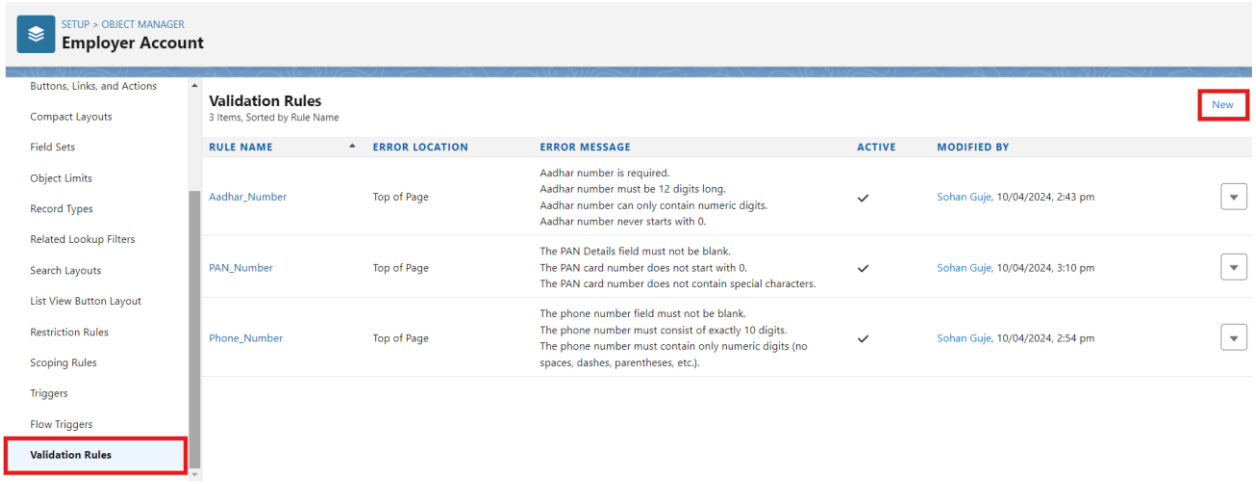

5. Click **Save.**

Milestone 9 - Validation Rules

Activity 1: On Employer Account

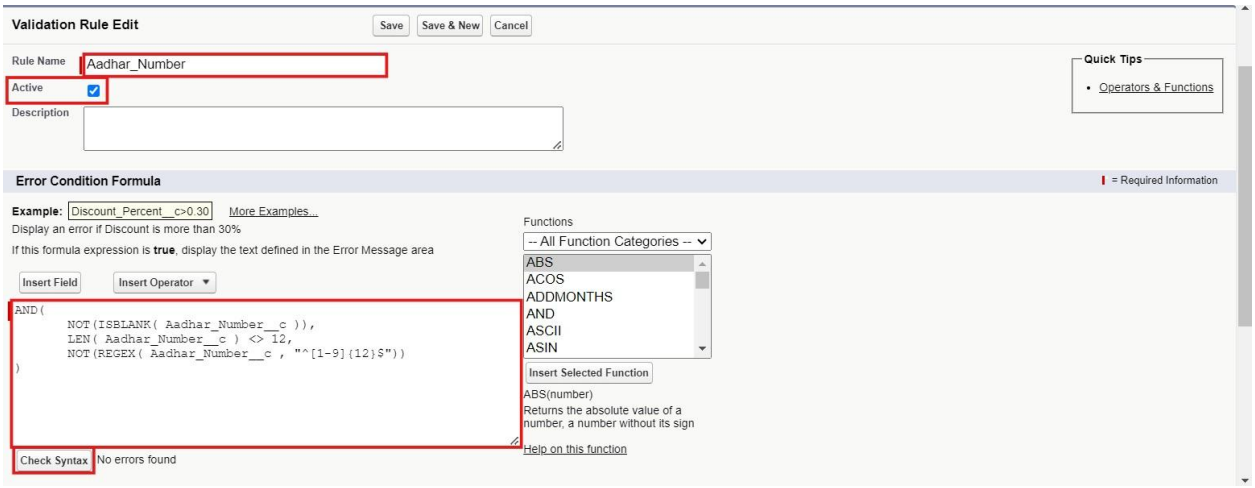

1. Go to the setup page → click on object manager → From drop down click edit for **Employer Account** object.

2. Click on the validation rule → click New.

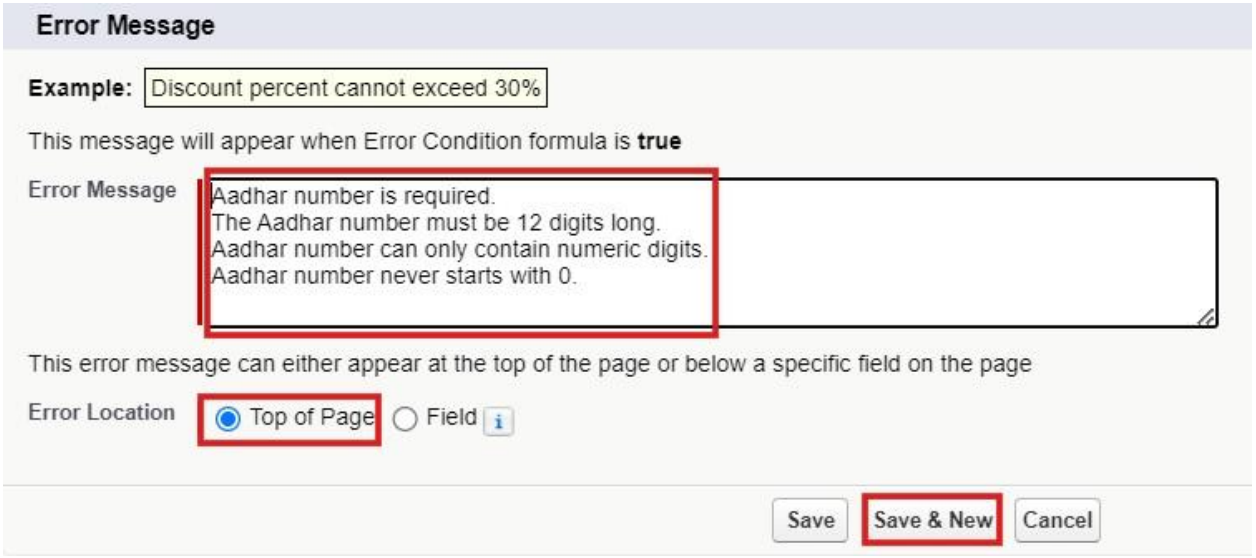

3. **Enter Rule Name :** Aadhar Number **Error Condition Formula** :

```
AND(
NOT(ISBLANK( Aadhar_Number__c )),
LEN( Aadhar_Number__c ) <> 12,
NOT(REGEX( Aadhar_Number__c , "^[1-9]{12}$"))
)
```

4. **Error Message** : Aadhar number is required.
The Aadhar number must be 12 digits long.
Aadhar number can only contain numeric digits.
Aadhar number never starts with 0

5. Click **Save & New.**

6. Repeat the same steps and create two more validation rules on the employer account object.

- **Enter Rule Name** : PAN Number

Error Condition Formula :

```
AND(
NOT(ISBLANK( Phone_Number__c )),
NOT(REGEX( Phone_Number__c , "^[1-9]{10}$")),
NOT(REGEX( Phone_Number__c , "^\\d+$"))
)
```

Error Message : The PAN Details field must not be blank.
The PAN card number does not start with 0.
The PAN card number does not contain special characters.

Click **Save & New.**

- **Enter Rule Name** : Phone Number

Error Condition Formula :

```
AND(
NOT(ISBLANK( Phone_Number__c )),
```

```
NOT(REGEX( Phone_Number__c , "^[1-9]{10}$")),
NOT(REGEX( Phone_Number__c , "^\\d+$"))
)
```

Error Message :
The phone number field must not be blank.
The phone number must consist of exactly 10 digits.
The phone number must contain only numeric digits
(no spaces, dashes, parentheses, etc.)

Click **Save.**

Activity 2: On Customer Account

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.

2. Click on the validation rule → click New.

3. **Enter Rule Name** : Phone Number

Error Condition Formula :

```
AND(
NOT(ISBLANK( Phone_Number__c )),
NOT(REGEX( Phone_Number__c , "^[1-9]{10}$")),
NOT(REGEX( Phone_Number__c , "^\\d+$"))
)
```

Error Message :
The phone number field must not be blank.
The phone number must consist of exactly 10 digits.
The phone number must contain only numeric digits
(no spaces, dashes, parentheses, etc.)

4. Click **Save.**

Activity 3: On Enterprise Account

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.

2. Click on the validation rule → click New.

3. **Enter Rule Name** : Phone Number

Error Condition Formula :

```
AND(
NOT(ISBLANK( Phone_Number__c )),
NOT(REGEX( Phone_Number__c , "^[1-9]{10}$")),
NOT(REGEX( Phone_Number__c , "^\\d+$"))
)
```

Error Message :

The phone number field must not be blank.
The phone number must consist of exactly 10 digits.
The phone number must contain only numeric digits
(no spaces, dashes, parentheses, etc.)

4. Click **Save.**

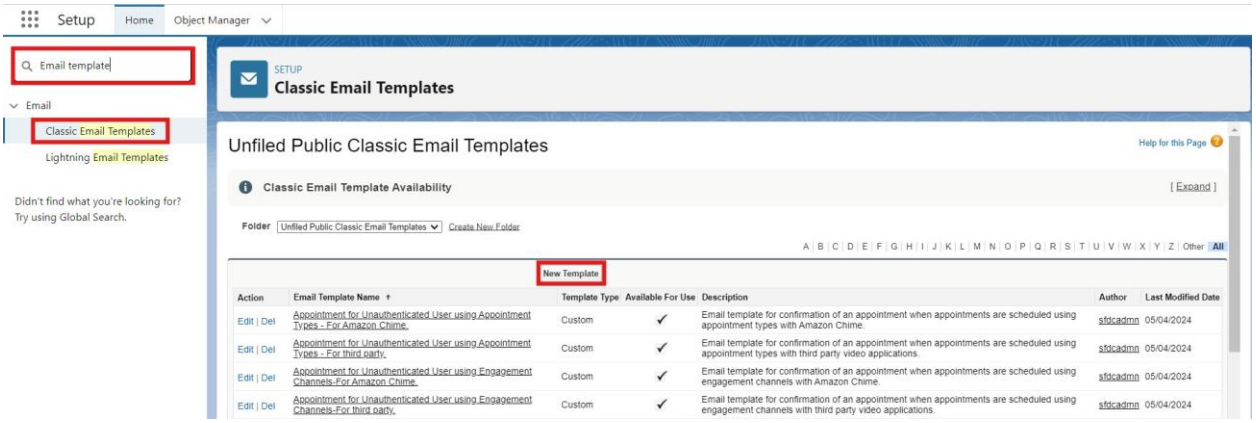

Milestone 10 - Email Template

Activity 1: Email Template

Milestone 11 - Flows

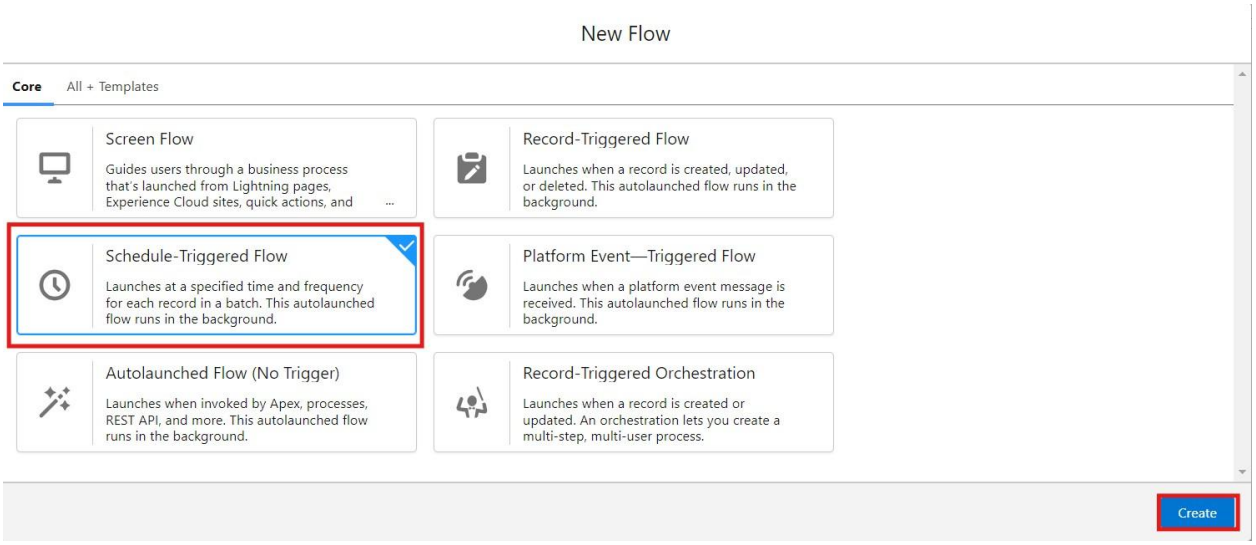

Let's create a scheduled Triggered flow to automate the Birthday offer mails.

Activity 1: Schedule Triggered Flow

1. Go to setup, Type Flow in quick find box → Click on the Flow and Select the New Flow.

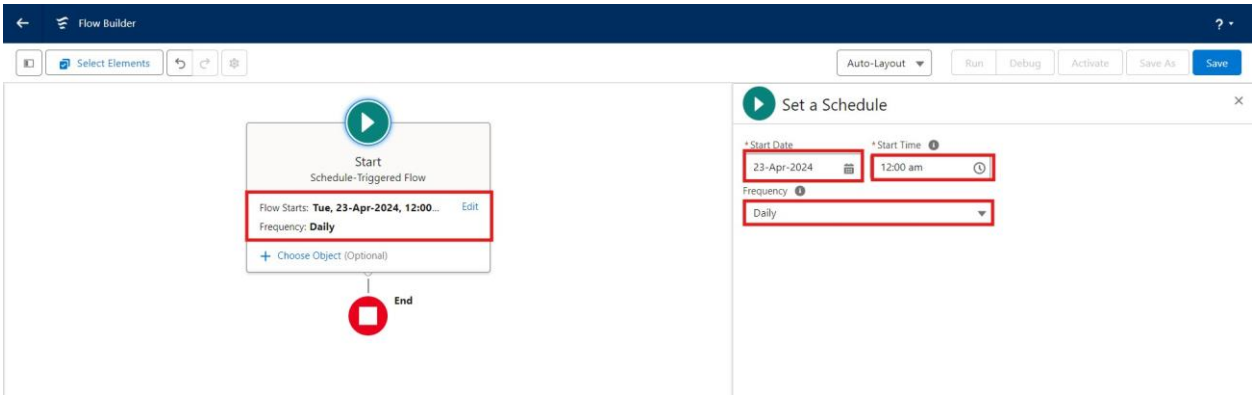

2. Select Schedule - Triggered Flow and click Create.

3. **Set a Schedule**

Start Date : Enter the Date, when you want to start the flow.
Start Time : Enter the Time, when you want to start the flow.
Frequency : Daily

4. **Create Object**

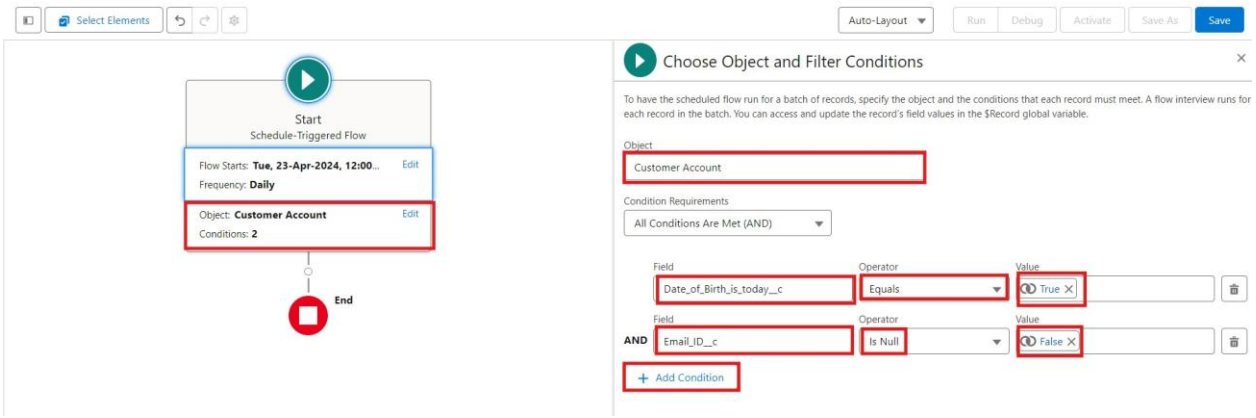

Object : Customer Account
Condition Requirements : All conditions Are Met (AND)

- Field : Date_of_Birthday_is_today__c

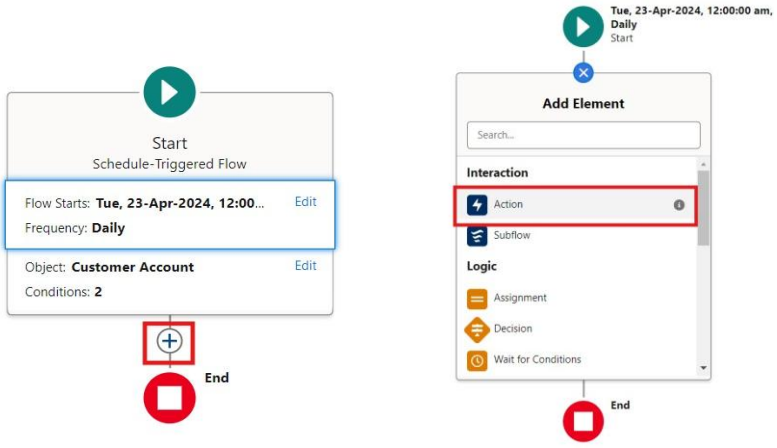

Operator : Equals
Value : $GlobalConstant.True

- Field : Email_ID_c

Operator : IS NULL
Value : $GlobalConstant.False

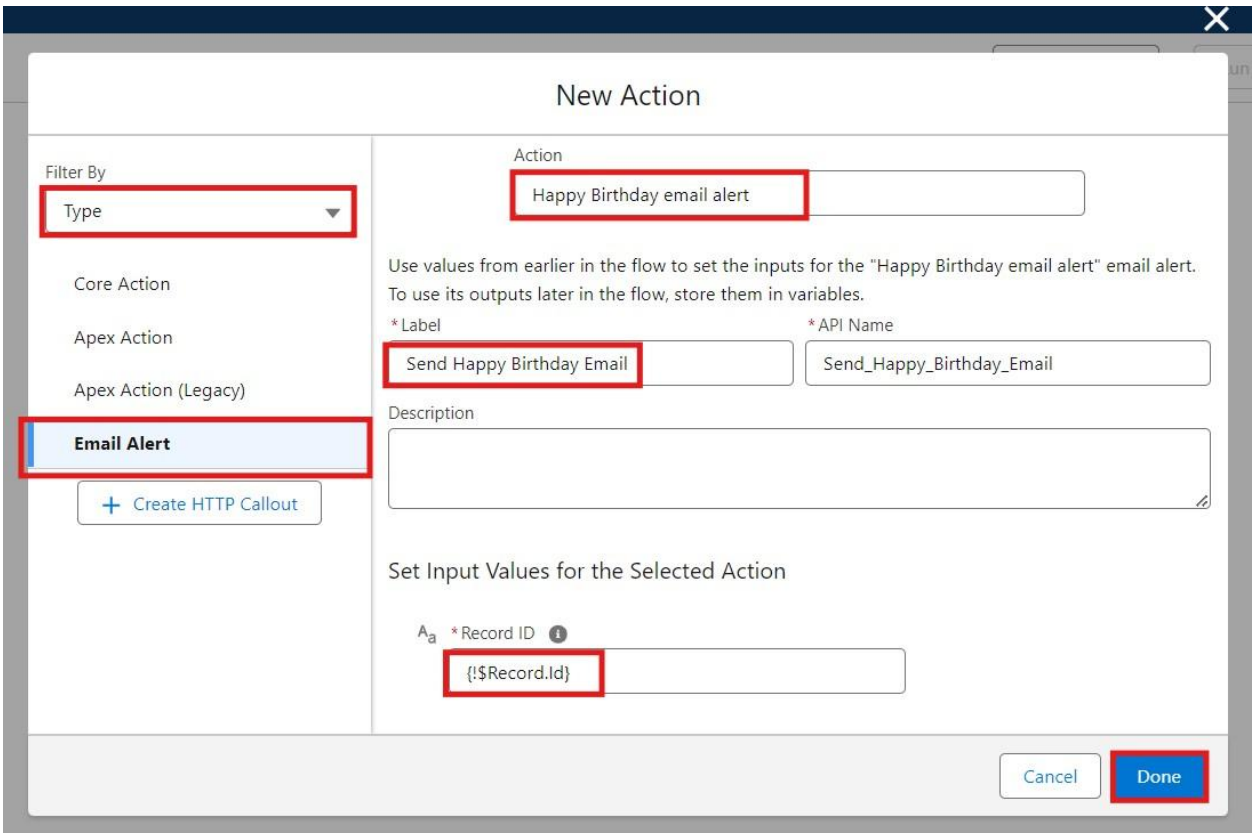

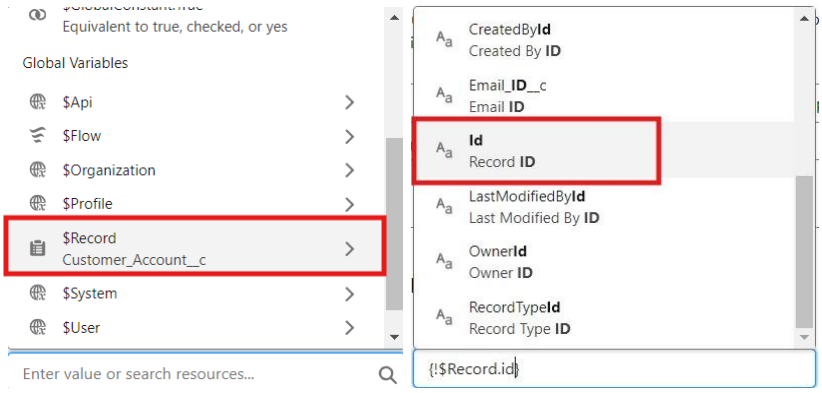

5. Click (+) Icon on the flow builder and Select **Action Component.**

6. In New Action Page

Filter By : Type and select Email Alert
In Action : Search and select Happy Birthday email alert
Label : Send Happy Birthday Email
API Name : Auto Populates
Set Input Values for the Selected Action : Record ID : {!$Record.Id}

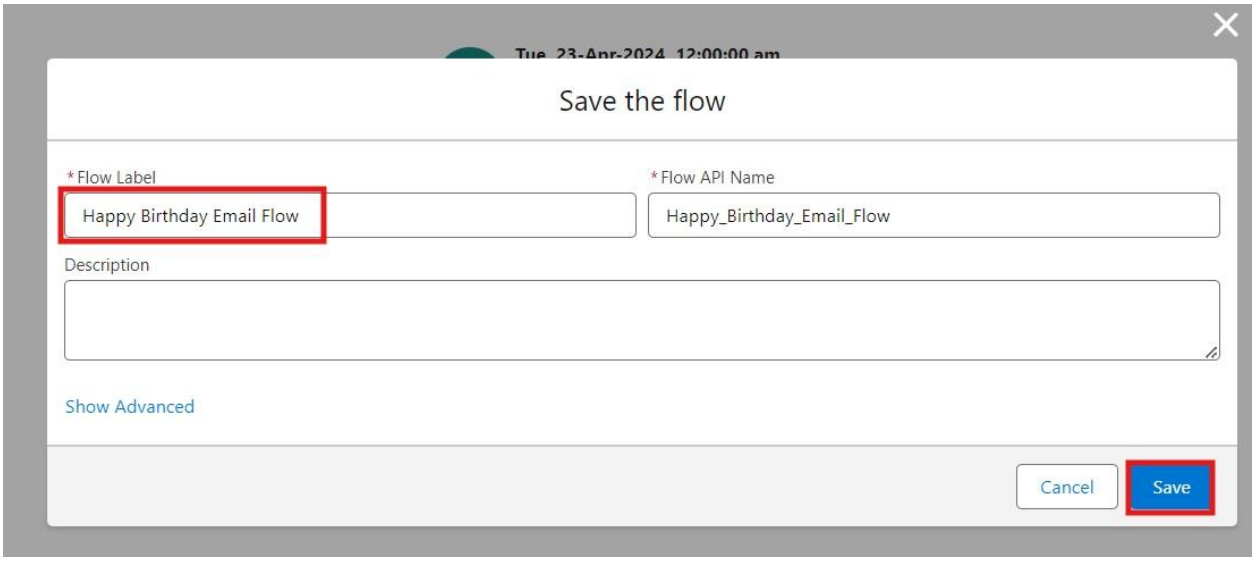

7. Click **Done**.

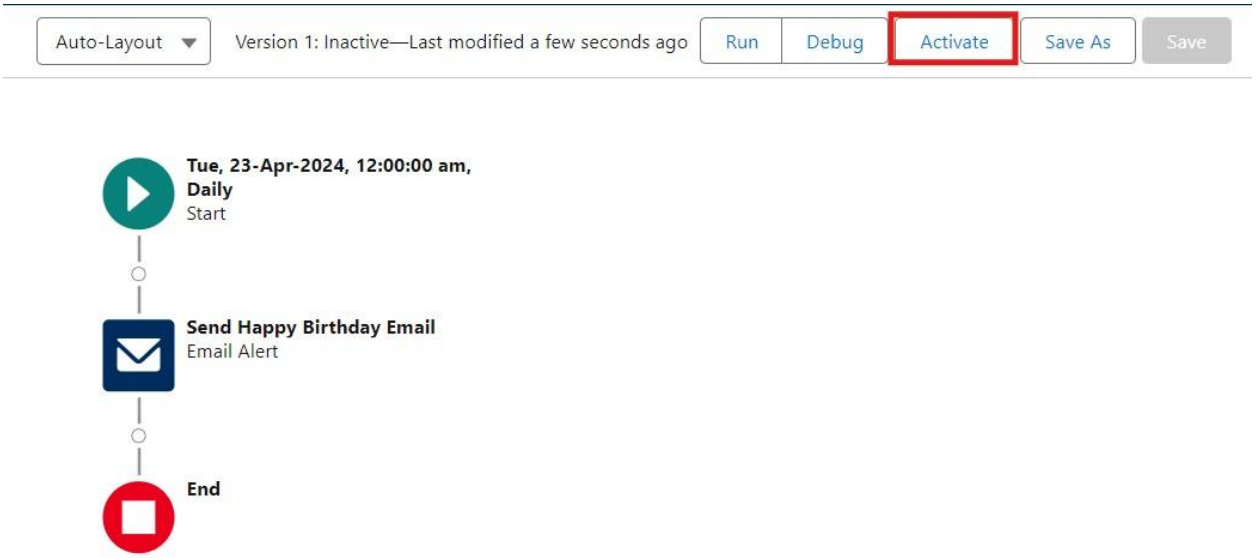

8. Click Save on the top right

Flow Label : Happy Birthday Email Flow

Flow API Name : Auto Populates Click **Save.**

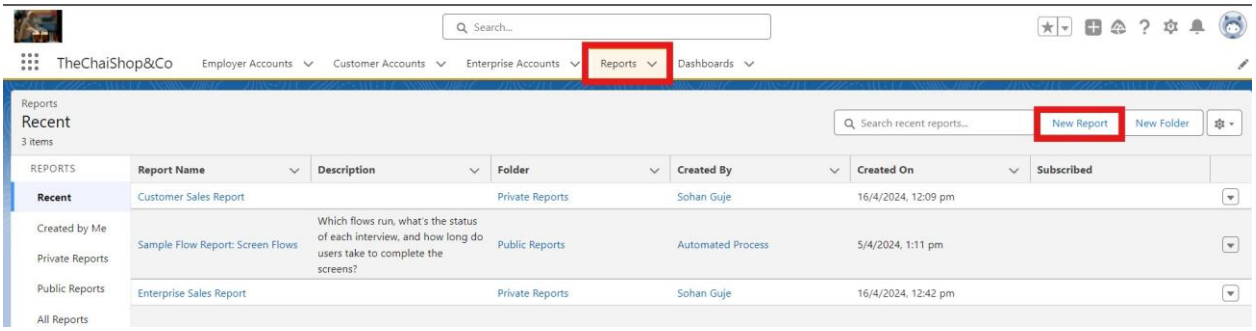

9. Click **Activate**.

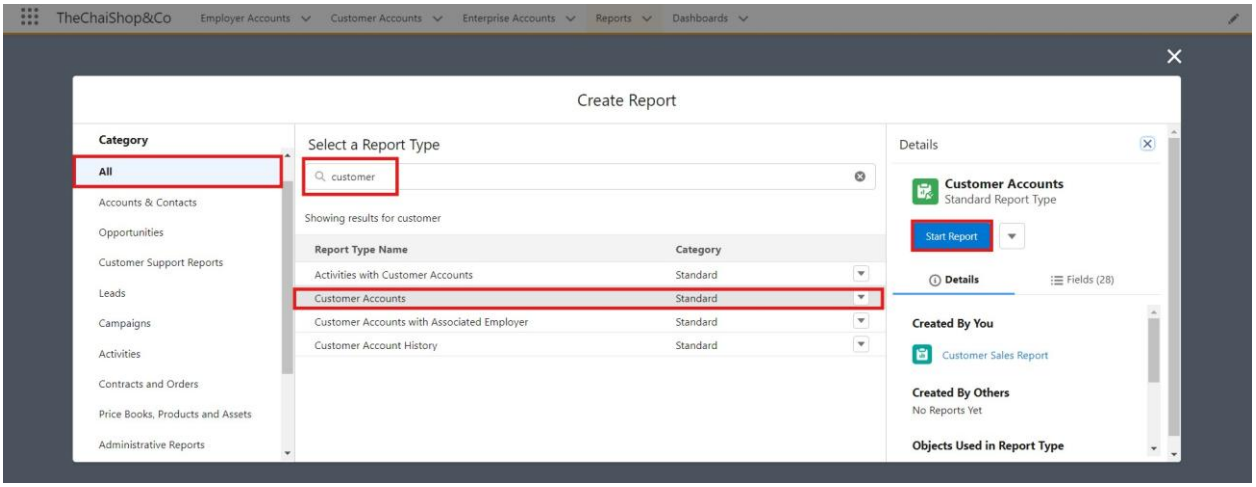

Milestone 12 - Reports & Dashboards

Activity 1: Customer Account Sales Report

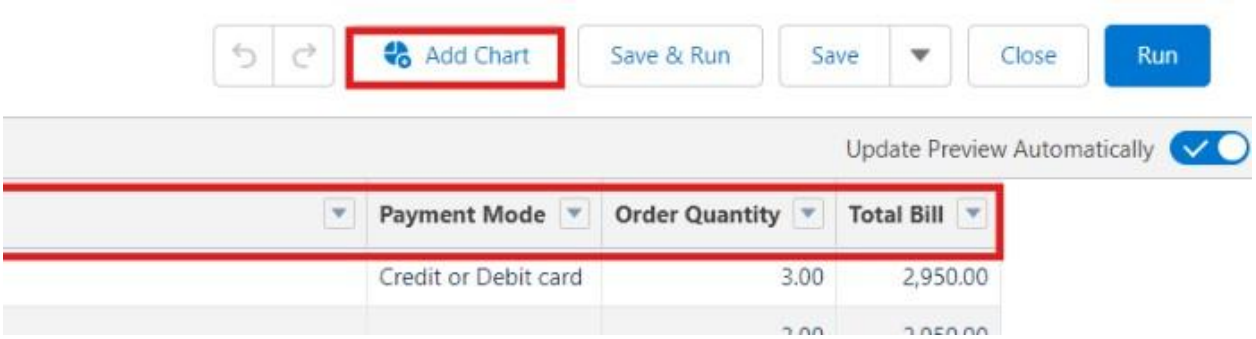

1. Click App Launcher and select TheChaiShop&Co.
2. Click Reports
3. Click New Report

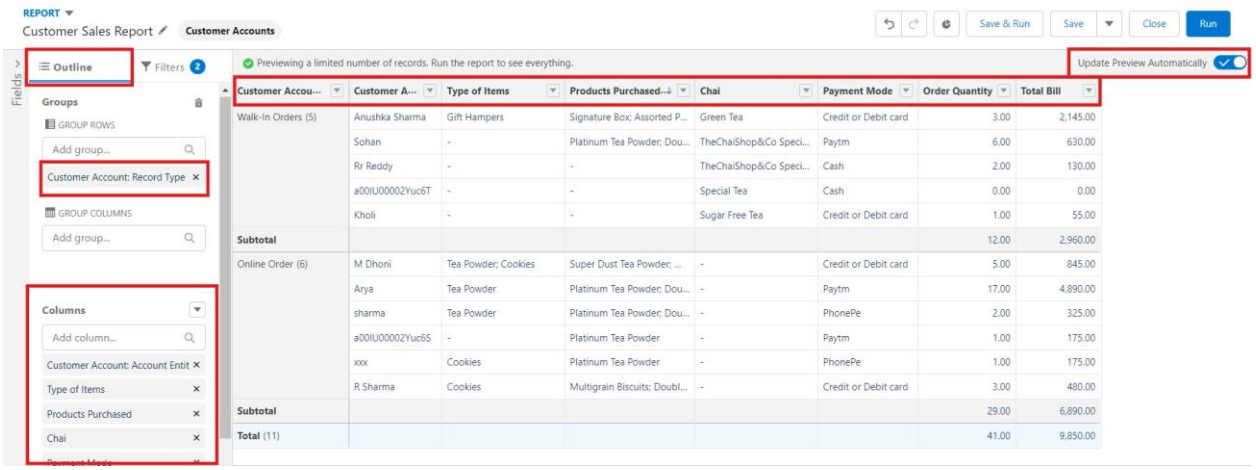

4. In search type Customer Accounts and Select Customer Accounts.

   Customer Account: Record Type
9. Click Add Chart on the top.

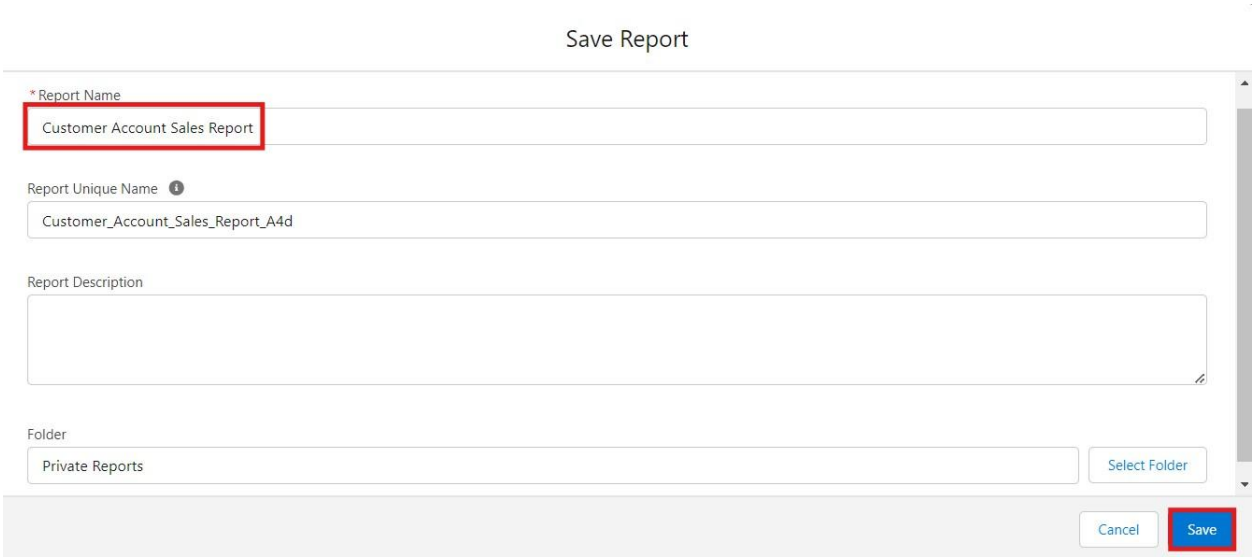

10. Click **Save** on the top right.

Enter

Report Name: Customer Account Sales Report

Report Unique Name : Auto Populates

Click **Save**.

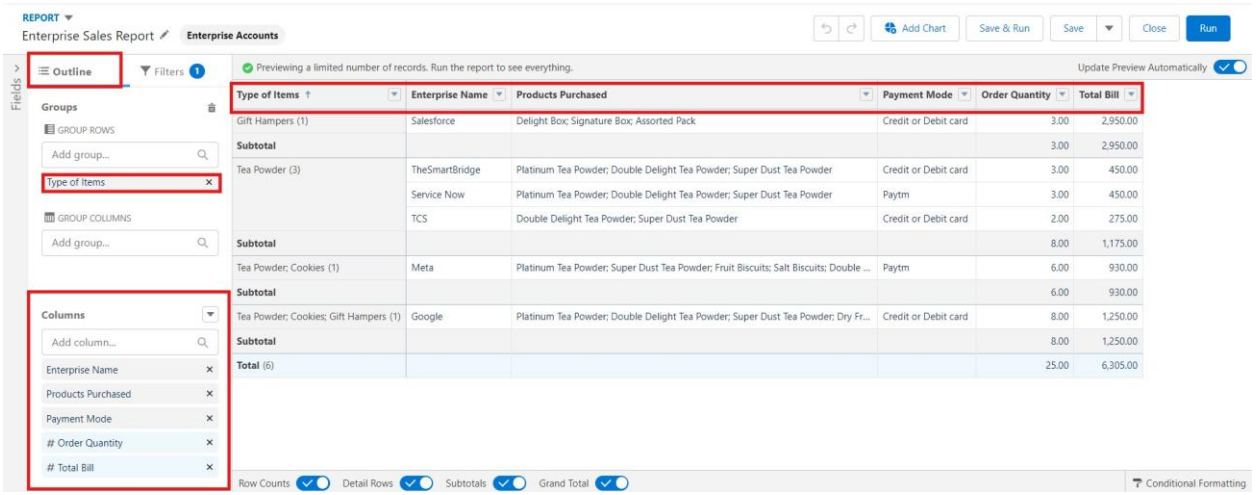

Activity 2: Enterprise Account Sales Report

1. Repeat the same steps to create another report.
2. Click Reports
3. Click New Report
4. In search type Enterprise Accounts and Select Enterprise Accounts.
5. Click Start Report.
6. Click the toggle **Update Preview Automatically** to **ON**.

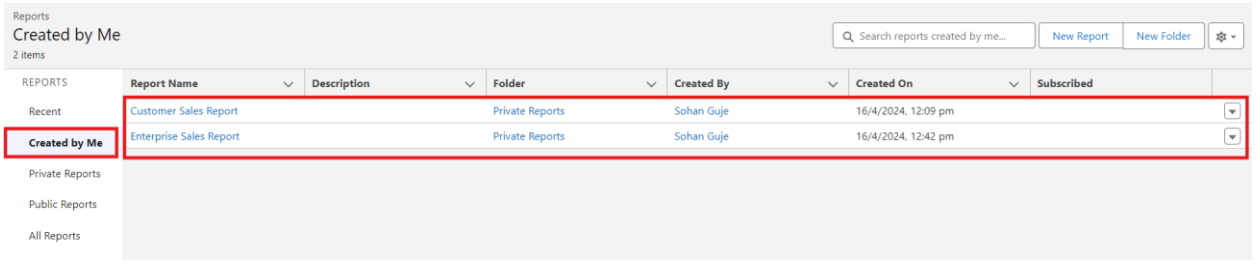

Drag and Drop all the required Columns from the Outline pane.

Group Rows : Search and Select
Type of Items.

7. Click Add Chart on the top.

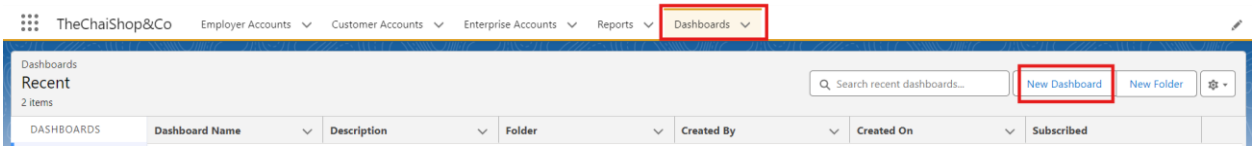

8. Click **Save** on the top right.
   a. Enter
   b. Report Name : Enterprise Account Sales Report
   c. Report Unique Name : Auto Populates
   d. Click **Save**.

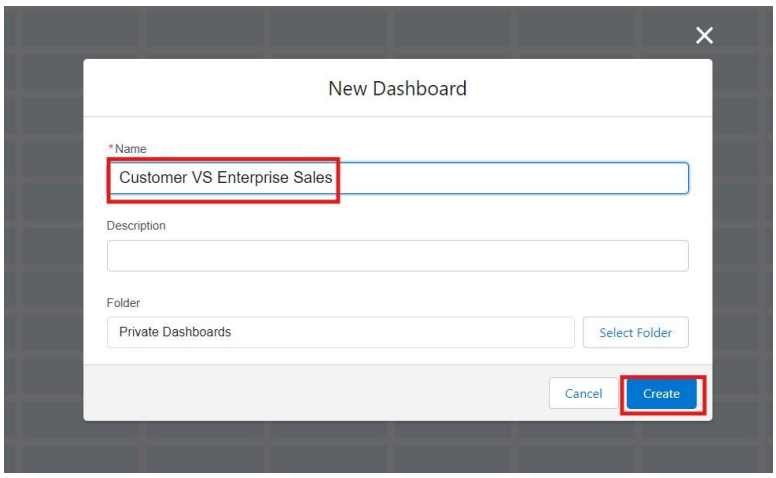

Activity 3: Dashboard

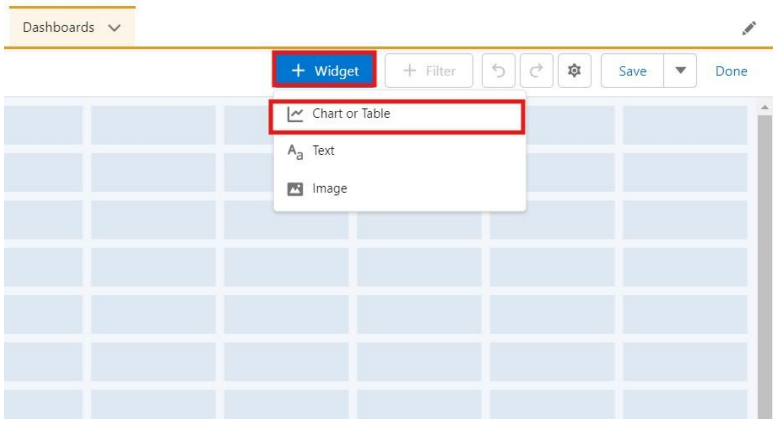

1. Click Dashboards
2. Click New Dashboards

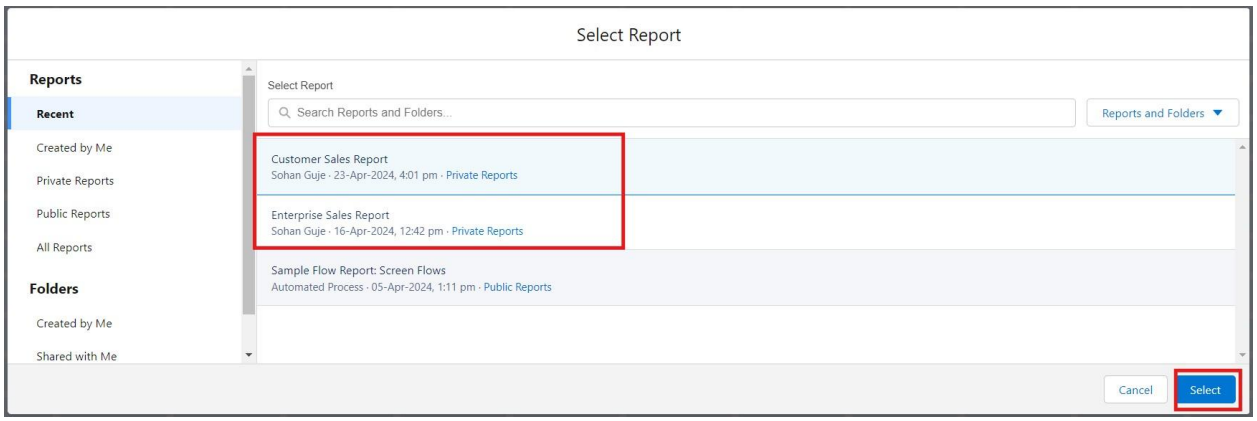

3. Name : Customer Vs Enterprise Sales 4. Click Create.

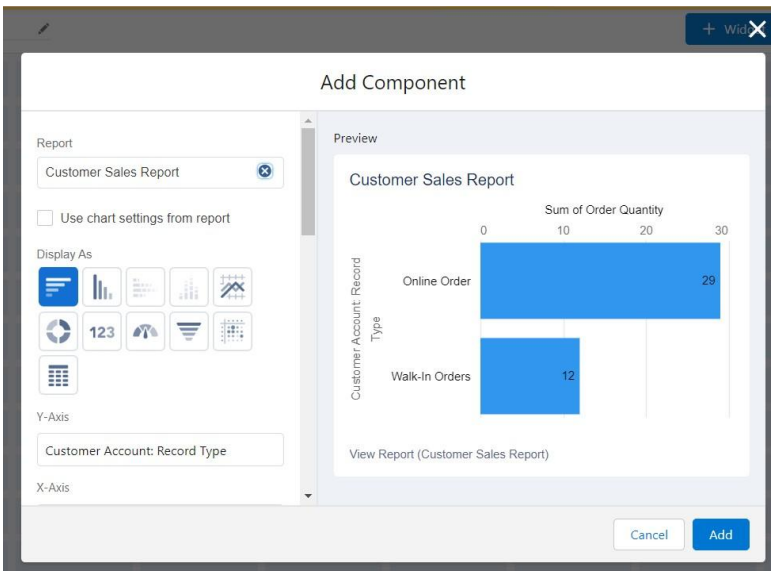

5. Click Widget
6. Select Chart or Table.

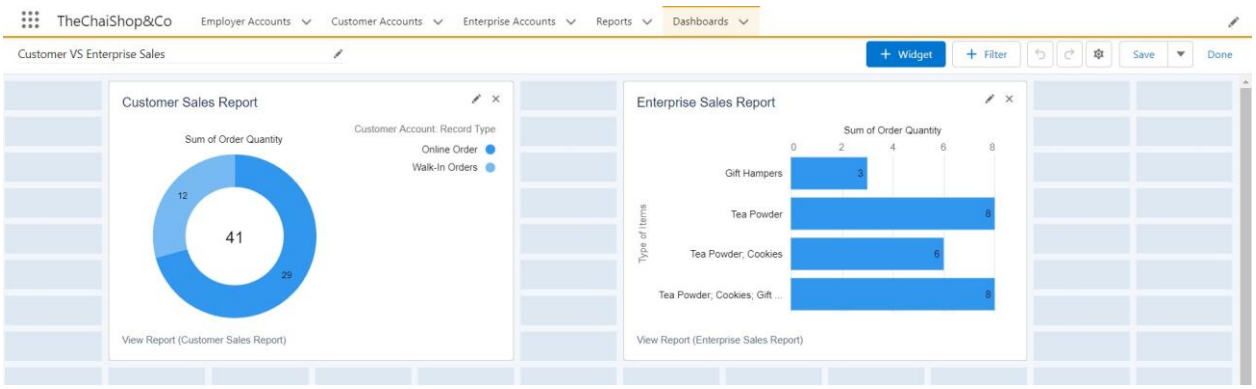

7. Select Customer Account Sales Report

8. Display As : Select the one which you feel comfortable with.
9. Click **Add**.

10. Repeat the same steps for the Enterprise Account Sales Report.
11. Click **Save**.

Milestone 12 - Conclusion

In conclusion, the development of TheChaiShop&Co CRM application marks a significant stride in enhancing the store's operational efficiency and customer relationship management capabilities. Seamlessly integrating employer details,

customer information (both online and offline), and enterprise data, this application streamlines business processes and enables informed decision-making. The automation of sales calculations, including order quantity and total bill amount, reduces errors and empowers employees to focus on delivering exceptional service. Moreover, automated email notifications for customers' birthdays foster personalized communication and enhance customer engagement.

7. FUNCTIONAL & PERFORMANCE TESTING

Performance Testing checks how well the CRM application performs under different workloads. It measures the application's **speed, response time, stability, and reliability** when many users or large amounts of customer and sales data are handled：

- Tests system stability under heavy workloads.
- Ensures sales and customer reports display correct information.
- Verifies valid and invalid login credentials.
- Verifies that orders are created and stored accurately.
- Tests system stability under heavy workloads.

8. ADVANTAGES & DISADVANTAGES

Advantages

- Provides organized information that helps management make business decisions.
- Stores customer details in one centralized system.
- Minimizes mistakes caused by manual record keeping

Disadvantages

- If the application is cloud-based, internet problems can affect accessibility.
- Employees may need training to use the application properly.
- Software errors or system failures may temporarily affect business operations

9. Conclusion:

The **CRM Application for TheChaishop&Co** provides an effective way to manage customer information, products, orders, and business activities in a centralized system. It reduces manual record-keeping, saves time, improves data accuracy, and makes customer information easier to access.
